Introduction

Learn more about what youth information and counselling is and find out what kind of fruit peer-to-peer is. This section aims to set the base for the context from where this training course came from as well as to explain 3 main themes (peer-to-peer education, youth information and facilitation). As a trainer delivering the peer-to-peer training course, you will need a bit some more knowledge in your pockets before the training course starts. If you are a young peer educator who just finished the training course, it is always good to refer to this introduction part (or even the whole manual) for a friendly reminder.

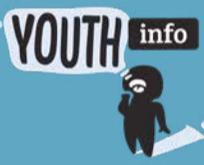

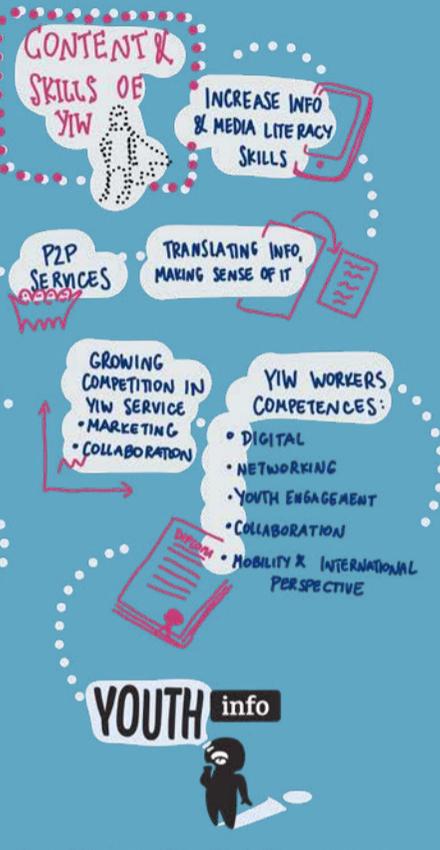

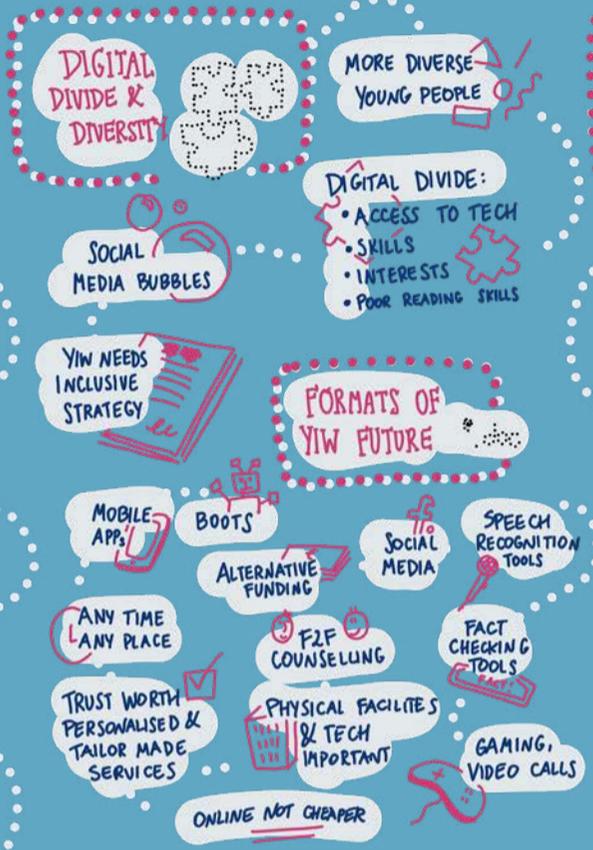

Context

This manual was produced as a common effort in the partnership of the international project 'Youth.Info: Future Youth Information Toolbox'. After we conducted the [youth information needs research](#) and implemented the first ever [Future Foresight methodology pilot](#) in Youth information sector we came across interesting conclusions. You can have a glimpse at the visual summary of both results:

FUTURE FORESIGHT

FINDINGS 2030

www.creativitas.it

Based on them partners chose three topics (employment, mobility, privacy) that are and will be important to explore for all young people across Europe.

Especially for such developing countries as Latvia and Lithuania, political awareness building and development of support instruments for YI workers as new tools for service provision are very needed. Transnational back-up and peer-learning opportunity is one of few ways for building up a successful YI structure in the time of change on the political level. Moreover, on the local level YI workers still need to gain practice on how to apply peer-to-peer methodology in their daily work.

This is how this training manual was created. We brought youngsters from 5 different countries in a training course in Berlin, back in 2018 and explored both, youth information, and peer-to-peer fields as well as the 3 newly created pedagogical tools that were developed during the project addressing specifically the topics of youth mobility, employability and data protection.

The outcome of this training course (and this is the reason why we find it very successful) is that youngsters developed more than 10 different local peer-to-peer activities covering the topics of youth information and successfully implemented them.

We want to give thanks to all the project partners involved and the young people who were brave enough to learn and share their achievements with their peers.

On behalf of the project team,
Agne Rapalaite
NGO Creativitas

How to use this manual?

All trainers, youth workers and even peer educators should take the time to read and understand the complete manual. Most of the work is preparing a training course carefully. This manual was built firstly with the intention to be the tool for trainers in the Youth information field to be able to implement the peer-to-peer training courses for local and international audiences. But then we realised that this will serve a perfect handout for youngsters, who successfully completed such course and maybe are willing to train other peers in the future. Using this manual, peer educators will make better choices and be better able to deal with situations they didn't expect. Believe us: there will be such situations. So do not get confused – it is meant to be read and understood by both sides.

The information about the method and pedagogy provided offers a framework within which to deliver the activities that follow. It is also important for the peer educators to read, understand and regularly reread the chapters on facilitation skills. There are many useful tips and tools for effective facilitation of groups and workshops.

This manual includes information and activities explaining how peer education works and what value it holds for youth and youth information workers. It is meant to help youth, youth workers, youth leaders, trainers and facilitators to design and implement quality peer education projects, based on best practices and experiences.

As well, the manual provides various activities to be used in the field of Youth Information addressing specifically the topics of Data protection, Employability of young people and Mobility opportunities for youth at local and European level. More pedagogical activities related to Youth Info can be found in ERYICA's network as well as in your own local organisation.

Depending on group needs and issues to be addressed, peer educators will choose (or create) activities dealing with Youth Information. Whether the workshop is 4 hours, 12 hours, or a series of 2-hour sessions, it is important to pay attention to the dynamic of the group and always start a session by "Setting up the Foundations of the group": to take time to host the participants, to introduce the workshop and peer educators, to explain the overall goal of the session, to take time to know each other and to set up shared ground rules all together. Then to dive into the topic.

It is important to keep a record of the workshops conducted: Share the Workshop Evaluation Form, including agenda, participants' evaluations, and an attendance list with the organiser as well as a picture

A FEW TIPS

Here are some 'quick and dirty' tips to help setting up an activity. More information about how to prepare the facilitation can be found in the chapter "Facilitation Tips".

AGE

While the manual is designed for youth and youth workers, the activities in this manual can be used with people from approximately 14 years old. However, many activities have facilitation options that are helpful for adapting the activity for use with younger or older participants. It all depends on peer educators' insight and the characteristics of the group.

GROUP SIZE

This manual assumes that the size of participant groups will range between 10-30 people to have enough diversity of perspectives, generating a dynamic and quality discussion. For everyone to be able to participate, it is ideal to have between 12-20 participants.

SPACE AND MATERIAL

Minimum space conditions for this training course are a large enough room, with moveable chairs, for participants to divide into small groups for discussion. There also should be chart paper and coloured markers, a projector and... Wi-Fi connection as standard material requirements. Participants are also visual learners, be attentive to keep the flipcharts on the wall, to use drawing/symbols/images and graphic facilitation skills for the participants to better remind the information.

PARTICIPANTS PROFILE

The main aim of this training course is to prepare young peers who volunteer in local youth information centres and points to get on board with the wider context and be motivated and skilled to implement local peer-to-peer activities. So, the **main participants profile are young people** aged 14-30 who are willing to contribute

to the youth information mission. The **secondary target group are youth information workers** who are directly coordinating these young people. This is how we implemented the pilot training course in Berlin – each national team had a group leader, who was fully involved in during the entire progress of the training course. We find it meaningful to have both sides on board – so that they can come with a common agreement how they will work together in the future.

If the training course will happen on a national level, this is even better! Teams from different youth info centres can learn more about other services across country or region, network and create synergies together.

In this manual, we will propose activities for the adult group as well.

READ FIRST

Steal like an artist, they say. There are so many great handbooks already published in the field of training and facilitation. So, we do not want to repeat the well spoken truths. We rather focus on our experience in the training concept we develop and leave the bigger picture to them. All this manual is based on several very important manuals in this field, so we recommend to download them and have at all times (and read of course!):

1. **Toolkit for Quality Peer Education** – this is where all the knowledge and understanding about the essence of peer-to-peer education is. Read it and recommend as a source to your participants as well.
2. **T-Kit 6: Training Essentials** – this is where all the theory behind organising a training course is. All the goodie theories, practical tips and questions for your reflection are here in one manual!
3. **Handbook for People Working with Youth Groups** – this one is especially important for youth information workers who will continue to coordinate youth peer groups in their info centres. It very well explains the idea behind the non-formal learning as well as gives a number of methods for different situations.

Background information on Youth Information

THE DEFINITION AND PURPOSE OF YOUTH INFORMATION AND COUNSELLING, ITS FORMS AND FUNCTIONS¹

Young people who are in transition from childhood to adulthood are at a special and very important point in their lives. They have to make certain decisions that will have a significant impact on their future. The choices they make about their education, career paths and other parts of their personal lifestyle will define their lives. These autonomous first-time decisions need to be based on unbiased, complete and comprehensive information. Often faced with dilemmas, young people turn to various sources of information, one of these being specialised or generalist youth information and counselling services. The term “youth information and counselling” can encompass a wide range of services that are set in different frameworks and provided by many different organisations.

The essential aim of youth information and counselling is to help guide young people in all aspects of their lives and in their autonomous decision-making. It builds on the fact that it is impossible to make a sound decision without knowing one’s options and alternatives. However, as well as being aware of the different possibilities, young people also need to evaluate the different options and relate them to their own abilities and aspirations.

Youth information aims to:

- **provide** reliable, accurate and understandable information,
- **give access** to different sources and channels of information,
- **give an overview** of the options and possibilities available on all relevant topics,
- **help** young people sift through the information overload they face today,

¹Marek Ivanovskis and Evaldas Rupkus, Compendium on national youth information and counselling structures, Luxembourg: ERYICA, 2014

- **ensure** that young people are aware of all the rights and services available to them and know how to access them,
- **provide support** in evaluating the information obtained and in identifying quality information,
- **guide** young people in reaching their own decisions and in finding the best options open to them,
- **offer** different channels of communication and dialogue in order to directly support young people in their search for information and knowledge,
- **contribute** to the information literacy of young people.

A function of youth information, that has become ever more important over the years, is **contributing to the information literacy** of young people, especially in our digital age. A critical approach to information has become even more important since the Internet allows everybody to publish on any subject. Young people have to be aware of the necessity to challenge the information they find straight away and of all the possible techniques available to evaluate and identify quality criteria.

Youth information strives to integrate these techniques, but not only in its own research, documentation and dissemination of information; it is also increasingly trying to develop different ways of transmitting the relevant key skills for modern life to young people themselves.

Moreover, a speciality of youth information is a certain form of translation that has to be provided by youth information workers. There is a lot of knowledge available nowadays, not least through the Internet. Often, and especially when it comes to topics that concern rather formal or legal issues – such as **education, family affairs, contracts, rights and duties** – the information provided is not easy to access and understand. In those situations, youth information does not create the information itself but acts as an interpreter.

Youth information uses a vast range of **techniques** – from informing to signposting and referring, from orienting to counselling – to guide young people through this process and support them in reaching their own decisions.

Below is a closer look at these techniques:

INFORMING:

providing reliable, accurate and up-to-date facts on all relevant topics for young people in an understandable and user-friendly way and putting them in a meaningful context.

NETWORKING / REFERRING / SIGNPOSTING:

providing not only relevant information, but also knowledge and a network on relevant topics in the area of service, thus being able to signpost or refer young people to the correct institution or person for their demand.

ORIENTATION:

putting the information offered in a broader context and offering the young person, through interaction with a youth information worker (whether online or not), the possibility to reflect on different alternatives and the consequences of deciding on each option.

ADVISING/GUIDING:

in addition to tailor-made information, young people from time to time also need a piece of advice or guidance of a professional. Youth information aims to help them by offering several points of view, while always ensuring that the decision is taken by the young person independently.

COUNSELLING:

in the youth information context, counselling very often focuses on clarification. In a guided and professional conversation, the youth information worker and the young person, first, identify the reasons and motives behind a question or a problem and then seek to clarify what the next steps might be.

Not all youth information centres and services offer all these forms of intervention. For example, in Europe counselling is not always seen as an integral part of youth information. What youth information services offer often depends on the provision of other services for young people in the area. The focus therefore should be on **meeting unaddressed needs** and not on duplicating existing services.

Youth information is a part of youth work and shares its **key values**, such as: **being open to all young people, acting in the interest of young people or defining its options based on the needs of the target groups.**

The key document describing the principles of generalist youth information is the [European Youth Information Charter](#). We recommend to go through this document carefully and reflect on the various aspects of this document.

In Europe, youth information and counselling field is being coordinated by **European Youth Information and Counselling Agency (ERYICA)**. [ERYICA](#) is composed of national bodies (non-governmental or governmental) which seek to guarantee the right of young people to full and reliable information, which helps them make the choices they face in their lives, and which promotes their autonomy and their active participation in a democratic society.

WHAT IS PEER-TO-PEER IN YOUTH INFORMATION WORK?²

The newly adopted [European Youth Information Charter](#) Principle 6 states that youth information should be:

PARTICIPATIVE

6.1 Young people participate in the production, dissemination and evaluation of youth information, at different levels and in different forms.

6.2 Youth information services and platforms for peer-to-peer activities.

6.3 Young people are encouraged to give feedback as an integrated part of the ongoing development of youth information services.

Therefore, organisations implementing this Charter, mostly every generalist youth information centre in Europe, should be ensuring participation of young people in their service delivery.

Participation is one of the main principles of youth policy and youth work in general. We find the manual “[Have your say](#)” as a very good resource for going into this topic. We will come back to this in the chapter about participation of this manual.

Any youth information worker might find him/herself in the situation when one is not sure about actual needs and lifestyles of young people. Therefore, from a very pragmatic point of view, peer-to-peer methodology might contribute to collecting knowledge about young people.

As Johan Bertels, the youth information expert from Flanders (Belgium), said: “The idea is not to make counsellors of them – they are just youngsters who know a little bit more, they can better identify what is happening in their environment and they can think what actions they could take”.

He also emphasizes on the young people role in giving feedback to youth information services and helping youth information workers to better understand quickly changing realities of young people. Professional work requires understanding the fact, that peer-to-peer approach is a continuous process, which demands some resources of the youth information service and the worker.

Regular work through capacity building of peer educators and availability of the supporter for them are the basis for a start.

So we invite you to start this journey with us today!

² Creativitas, “Recommendations for Peer-to-peer in youth information work”, 2015

Understanding Peer Education³

WHAT IS A PEER?

- A bug?
- A fruit?
- A friend?
- A city in Belgium?
- Something else?

What a weird word: “peer”. Its meaning remains unknown, in some languages the literal translation is not even existing. But we are all surrounded by many peers without even realizing it (and don’t worry: it’s not a bug.)

A peer is a person who belongs to the same social group as another person or group. Peers are individuals who share related values, experiences and lifestyles and who are approximately the same age. The connecting element (or “peer factor” as we like to call it in EPTO) can also be based on other aspects of a person’s identity such as:

- ethnicity > members of an association of immigrants
- religious or philosophical belief > pupils in Catholic Sunday school
- gender > a group of girl scouts
- sexual orientation > members of a LGBTQ association
- occupation > a colleague at work or school
- socio-economic and/or health status > homeless people, or patients of a centre supporting people with diabetes
- physical or personality traits > red haired people in school
- history or origins > a club for young members of an African Diaspora

Peer also means “equal”: “meaning we all learn together and that all our contributions are of equal worth”.⁴

Essentially, a “peer” is someone in whom I see part of myself. Someone “like me” in one or more aspects of my identity. Recognizing someone as a peer is often unconscious and intuitive. It doesn’t necessarily mean that this person is a friend, but may as well be a start.

WHAT IS PEER EDUCATION?

We learn a lot of what we know and who we are throughout our lives from our peers. Peer education is a way of giving an intention to such an important influence. It is a way of influencing our peers’ life in a positive way.

Peer education is a **“non-formal learning process that gives empowerment, confidence and independence to young people whatever their background”**⁵

Peer education happens when **young people carry out informal or organised activities with their peers, over a period of time, to develop their knowledge, skills, beliefs and attitudes enabling them to be responsible for themselves and others and to create a space where they can feel well, safe and respected.**⁶

Peer education rests on the idea that “young people are the experts on their own lives and are therefore the best starting point in any learning process”⁷. Peer education enables youth to deal effectively with problems that affect them. The process can be partly social, thereby establishing forums for young people to explore new frontiers, helping to solve problems and letting people in positions of authority gain a better understanding of the point of view of youth.

As obvious as it may sound, the success of peer education initiatives lies, first and foremost, in one’s capability to truly consider youth as equal partners. According to the Domino Manual produced by the Council of Europe:

- Youth are ready-made experts. They have a unique perspective on the issues that affect them and can often “make things happen“.

³EPTO, Toolkit for Quality Peer Education, 2016

⁴SALTO Youth Cultural Diversity Resource Centre. PEERing In PEERing Out: Peer Education Approach in Cultural Diversity Projects

⁵SALTO Youth Cultural Diversity Resource Centre. PEERing In PEERing Out: Peer Education Approach in Cultural Diversity Projects

⁶Adapted from United Nations Population Fund and Youth Peer Education Network (2005). Youth Peer Education Toolkit. Training of Trainers Manual, New York (USA)

⁷SALTO Youth Cultural Diversity Resource Centre. PEERing In PEERing Out: Peer Education Approach in Cultural Diversity Projects

- As role models to their peer group, youth have the potential to demonstrate effective communication styles and approaches. This may be accomplished through workshops and games, music and mass media, discussion or storytelling.
- Where resources are limited and large numbers of people have to be reached, peer group education has a multiplier effect. Such programmes also have an informal cascade effect, creating “buzz” in a local community.
- If encouraged and supported, youth can control the process of education and information exchange. Whether or not this occurs depends upon the setting in which a programme is operating. Peer group education can help to foster youth participation in programmes of formal and informal education.⁸

NOTE: EPTO focuses on peer education by, with and for young people; but it can be used with many populations and age groups for various goals.

WHERE DO YOU FIND PEER EDUCATION?

Peer education can take place in any setting where young people feel comfortable: in schools and universities, clubs, churches, community centres, workplaces, on the street, on the Internet... It can happen in small groups or just between two people.

Peer education can be as simple and informal as when your friend is teaching you how to use makeup, how to juggle, how to play a musical instrument, how to fix your radiator... It can also be more “formalised”. Here are some examples of youth peer education activities:

- **Within schools:** training a group of peer trainers who could raise the awareness of other youngsters on specific topics (for instance by organising a 2h workshop in a classroom, by participating in a thematic week/day in the school, by contributing to an external activity with classmates...).
- **Within youth organisations/youth centres:** training a group of peer trainers who could organise specific activities for the other members (for instance through workshops, sport, exhibitions, music, drama, street education...).
- **Within youth movements:** scouts, guides and others have been using peer education for years. Some of them could be trained on issues they would like to address and discuss with others (for instance how to deal with cultural diversities when organising camps abroad).
- **Within institutions for young offenders:** training a group of peer trainers who could support newcomers (for instance by negotiating the ground rules, by raising awareness on stereotypes, by being more aware of their rights and responsibilities as citizens...).
- **Within the media:** training young journalists on how to support and mentor colleagues in dealing with sensitive issues, on how to use specific techniques and materials...
- **Within political groups, within a group of volunteers, within a community centre, within a health-care institution, within a group of students, in your neighbourhood, with your friends and family, with your fitness club...**

⁸ Council of Europe (1996). D'Omino. A manual to use peer group education as a means to fight racism, xenophobia, antisemitism and intolerance.

Peer education diagram

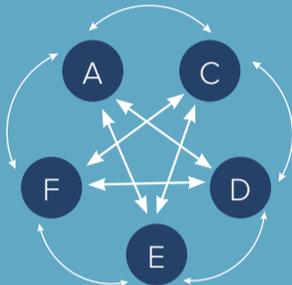

Peer education in informal settings:

PEER A teaches something (how to knit) to PEER B.

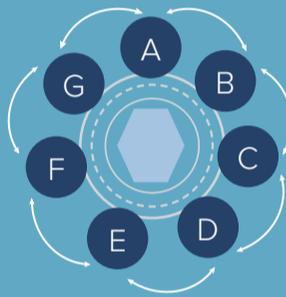

Peer educator developing a project with its peers:

PEER A is organising an exhibition with PEERS C, D, E, F.

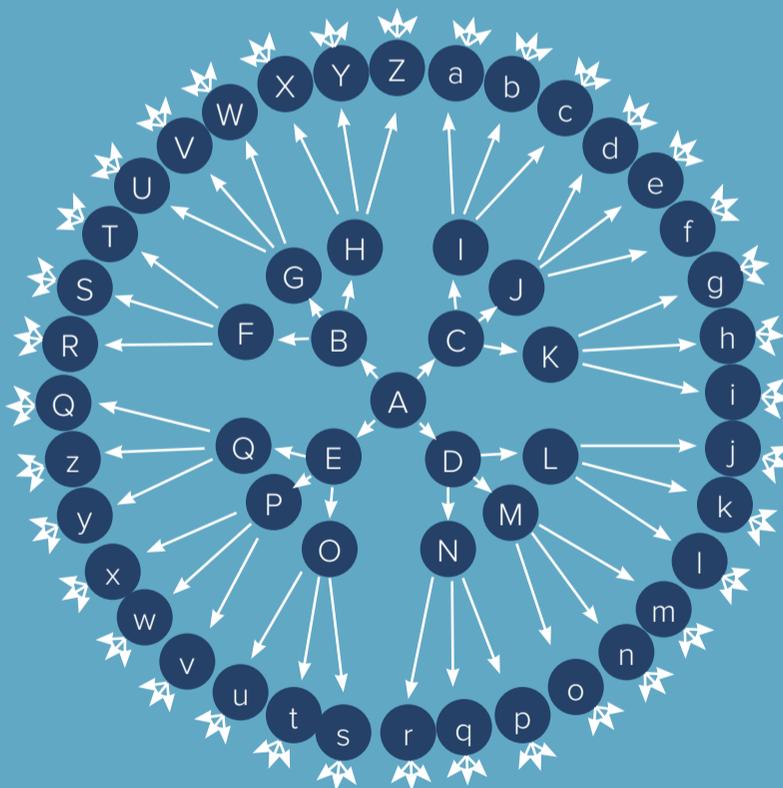

A youth worker encouraging peer exchanges, peer education between members of a youth groups:

Someone who's not a peer for the group (a 50 years-old youth worker) encouraging peer exchanges, peer education.

Peer trainers train other peer trainers who will train other peer trainers:

PEER A trains PEERS B, C, D, E to become peer trainers who then train other peers, etc. = a snowball effect.

You may have heard of a variety of peer-related approaches. In most of them there is some form of education involved, so "Peer Education" is a big umbrella term, which we can fit many other approaches: Peer Training, Peer Information, Peer Review, Peer Leadership...

WHAT IS PEER TRAINING?

4.1. A horizontal process

The method of peer training is based upon the belief that **young people deliver a message to their peers that is often more credible and efficient than when it is delivered by authority figures**. Contrarily to formal education settings where the transmission of knowledge is vertical (typically: a lecture delivered by a teacher to its pupils), peer training is a horizontal process where peers educate each other in a spirit of mutual learning. It assumes that all individuals are both learners and teachers and that the knowledge of a group is necessarily greater than the knowledge of one individual.

Peer training methods have been used by many over the years, from upholding the theories of Aristotle to joint educational systems, which were very popular in Europe in the 18th century.

Peer training is now an increasingly important form of non-formal education in the youth sector, providing

opportunities for youth empowerment through the development of self-awareness, social consciousness, special skills or talents, intercultural competencies and community-based projects.

It requires a pedagogical reflection about how to support young people in the long term to develop competences such as a growth mindset, self-awareness, self-confidence, communication skills, teamwork skills, public speaking skills, facilitation skills, leadership skills, etc. Therefore, it entails to designing training processes for young people, defining learning outcomes, and creating mechanisms to support youth in assessing, improving and transferring their competences in their personal and professional lives constantly.

4.2. A form of social action

Education is never neutral. It is either designed to maintain the existing situation, imposing the dominant culture, knowledge and values; or education is designed to liberate people, helping them to become critical, creative, free, active and responsible members of society.

People will act on the issues on which they have strong feelings. Training is a way of identifying issues of importance NOW to youth, generating critical thinking and motivation to participate in addressing social or political issues.

Peer training is, as an independent process, a political action that facilitates youth participation in society. Through training, young people experience intercultural microcosms, learn to articulate values and concerns, gain valuable skills, and can be motivated to take social or political action. Whether they are conscious social or political actors, or merely getting through life, youth have influence in a variety of sectors. The great potential they have to make positive contributions to society with consciousness and intention has not been fully tapped.

Educating and supporting young people as change agents of any kind can ultimately inspire a general evolution in the culture at large. Adults, organizations, and institutions can consider youth perspectives and needs when making decisions. If the general youth culture has an intercultural consciousness and demonstrates new competences to succeed in a diverse world, many other sectors in society will follow.

Some good practice examples on Peer-to-peer in youth information from Europe:

VERTTI – A PEER-TO-PEER YOUTH INFORMATION INITIATIVE IN FINLAND

Vertti is a peer-to-peer youth information initiative, funded by a grant from the Ministry of Education, which started as a pilot project in Turku region in Finland in 2007. The idea was to try a new type of peer-to-peer information model, and one of the objectives was to encourage and involve young people in planning and carrying out youth information activities in their school. The guiding principles were to mobilise young people's own ideas to improve the availability of youth information at school and to develop co-operation between municipal youth workers and schools. In Vertti initiative, 13 to 16-year-old secondary school students that have volunteered to participate are trained to become peer-to-peer youth information officers (Vertti information officers, VIO).

Since Vertti initiative is a joint effort between schools and the municipal youth services, three different people need to be involved: 1) a secondary school student who wants to become a VIO; 2) a contact person at school, such as a principal, student counsellor or teacher; and 3) a youth worker who coordinates the VIOs. After the project, the tried-and-tested initiative has become an elemental part of youth work in nine municipalities in Turku region.

The initiative is coordinated by the Youth Work Centre of Leisure Section of the City of Turku, but co-operation in planning and implementation in the participating municipalities covers all youth workers who work as Vertti coordinators.

WATCH YOUR WEB – INFOSCOOTS, GERMANY

Watch Your Web is a project on consumer protection oriented Youth Information and Media Literacy in social networks since 2003 in Germany. It aims to sensitize youths for a responsible use of data online. Besides an information portal, a video magazine and information brochures, the project also makes use of the Peer-to-Peer approach and involves youths in the information.

It organises trainings for young people to become a so-called Infoscout. The “watch your web Infoscouts” help others use digital media in a safe and responsible way. They address problems and demonstrate safe practices. Any driven young person between 14 and 20 interested in media can become an Infoscout. Infoscouts take on the responsibility to be available as contact persons for topics related to Internet Security at school, in youth groups and online. They are trained in the fields of “data privacy”, “smartphone security”, “consumer protection” and “cyber-mobbing” and learn methods which enable them to pass on their knowledge to others. Every Infoscout is obliged to organise an event on a specific subject. This can be a workshop, a presentation, a flashmob, a consultation-hour and much else. They receive and create materials for their performance with which they can inform other young people about the edited topics.

“PEERS AND PERSPECTIVES” – EPTO, BELGIUM

“Peers and Perspectives” is an EPTO project that brought together 16 Brussels’ youth from all backgrounds to share their experiences regarding identity and diversity matters, and set up their own field-projects to shape an inclusive future for their home city through peer education.

The idea of the project was born in the aftermath of the Brussels attacks, which saw a degradation of the social and political climate nationwide, a rise in distrust between communities and a strengthening of extreme ideas across the spectrum. Brussels is home to a very diverse and young population – however, an inclusive society can only be built if these young citizens from all walks of life get a chance to meet and exchange. Which led EPTO to the project, “Pairs et repères pour construire la Bruxelles de demain” – Peers and references to build the Brussels of tomorrow. The aim was to bring together 20 youths from

different social and cultural backgrounds that would not usually meet, to discuss questions of identity and diversity, to learn how to recognise and deconstruct prejudice, and to ultimately come up with their own citizen projects across the city. These projects reached at another 300 young people and the general public. Based on their interests, preoccupations and aspirations, participants were free to decide what project they wanted to develop: an interconvictional evening about the role of youth in the interreligious and interconvictional dialogue in Brussels, with a remarkable debate followed by a buffet and a concert; a workshop on how to fight discrimination as a young citizen in Brussels; and an Intercultural Treasure Hunt on cultural diversity. Through the learning process of setting up their own projects, they made themselves heard and visible in the public space and debate, reflect and make others reflect on their role as young citizens, and contribute to building an inclusive future for all young people in their hometown.

MORE(SOCIAL)MEDIA! - HYVINKÄÄ CITY YOUTH DEPARTMENT, FINLAND

The main aim of the More(social)media! - project aimed to develop information and counselling services online and promote active participation through digital youth work. Youth workers designed the project plan, applied for funding and were in charge of using it. Activities were carefully planned to fit the environment and the intended goals. The youth workers arranged events for young people to provide them with the possibility to engage, to explore and express themselves. We developed information and counselling services and digital youth work through the active participation of young people – or did we? Who is we?

One year into the project the content and the goals of More(social)media! were re-written by young people. The original aim stayed the same, but the methods, strategy, networks, applications used, environment and time frame changed. Instead of expecting young people to enter into our comfort zone, we – the youth workers – entered into theirs. By doing so, we managed to establish a common way of providing information, arts and events with young people, to everyone. By embracing non-formal learning and using digital tools to connect and engage, the project managed to enter the digital environment, predominantly made up of young people, and develop youth information and counselling services online.

In digital youth information work, sharing is more than just clicks and likes on social media. It is embracing interaction, and most of all – it is finding a sense of belonging and people you appreciate, and who appreciate you. It is easier to engage and share when you can relate to the content and know that you are not alone. For the promotion of active participation and youth empowerment, the establishment of an inclusive and interactive way of providing and producing information, media, arts and events with young people is crucial. To do so, young people and youth workers need to identify each other's interests, aims, challenges, hopes and dreams – which requires trust, interaction, effort and time. A youth worker is involved in all stages as a participant and support, rather than as an administrator.

We have learnt that the development of online information and counselling services and digital youth work through the active participation of young people requires a lot of resources and time. Youth workers should not spend these resources for young people, but with young people.

Organisation:

Hyvinkää City Youth Department, co-funding with the Regional State Administrative Agency of Southern Finland

Training course for peers: this is how we did it

Now you know the context of youth information and counselling as well as that peer-to-peer has nothing to do with fruits. Time to learn how to implement a Peer-to-Peer training course for young people at your youth information service. We will provide you with a little bit of theoretical background and very practical methods and tools to deliver this training course in a quality way. Tested and proved! Shall we present the training course aims and objectives?

Aim:

To train young people to become youth group facilitators and information multipliers using the various youth information tools.

Objectives for the participants:

- to learn about peer education and how to organise youth information activities for their peer on a local level;
- to improve their competences in communication, planning, time management, group dynamics and other;
- to learn to use the different youth information tools with other youth;
- to plan local activities/sessions for their peers.

Recommended duration:

5 full working days

Programme overview

Take into the considerations the colour coding of this programme – you will find that the chapters of this book has the same colours as some of the parts in the programme. This will help you to refer to a certain area afterwards.

What is more, you will find certain codes made of numbers and letters – no worries, it is easy to decode them! Each little code refers to a certain method in this manual. Just look at the table of contents and refer to it!

Day 1	Day 2	Day 3	Day 4	Day 5
ARRIVAL	BREAKFAST	BREAKFAST	BREAKFAST	BREAKFAST
Introduction	Check in D5, D6	Check in D5, D6	Check in D5, D6	Check in D5, D6
Group building activity A1	Youth Information: Intro and presentation of YC B1	Experiencing the tools IO4	Preparation of the Peer Practice C2.2, C2.3	Q/A about facilitation competences D

Check out A4	Check-Out A4		Debriefing & Identifying needs C.2.3	Closing A4
	Buzz group for adults D5, D6	+ Buzz group for adults D5, D6		
DINNER Evening Activity	DINNER Evening Activity	DINNER Evening activity	DINNER Farewell evening	

Have in mind, that this is just the proposed structure for the training course. **You can be flexible** in changing the activities and methods and adapting them to the needs of your target group. What is more, if you are actually a youth information worker and working with a group of youngsters in your daily work – you can implement this flow session by session once a week. It is up to you how to make it work!

Nevertheless, for the full experience, **we recommend to cover all the thematic areas:**

- on-boarding the group and looking after the dynamics of the group, at the end closing the process;
- presenting the concept of Peer-to-Peer approach;
- presenting the context of youth information and counselling services;
- giving them a chance to prepare, perform an info session using various topics and tools and reflect the learning outcomes;

- introduce them with several tools they can use as peers (we will use the 3 tools that were created during the project Youth.Info: Future Youth Information Toolbox);
- organise a “Peer Practice” within the group where they can have a first experience in facilitating activities in a safe environment and provide constructive feedback;
- plan local practice activities;
- if you will have adult youth information workers and staff in the training course, make sure you give a chance for them to learn as well and get them on-board with the group and training course process.

Setting up the foundations of the group

What is a Group?⁹

According to the [T-Kit 6: Training Essentials](#), from an educational point of view, people being trained together while very often sharing the same accommodation encourages them to live an unique experience which can support their learning in many ways.

The **advantages include:**

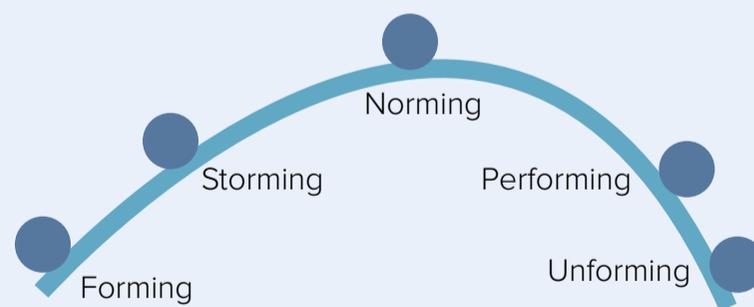

- Learning together and **sharing experiences**.
- **Learning from each other**. In peer-group education people share their experience and as positive models can also shape the behaviour and attitudes of their peers.
- A **protected learning context** in an artificial situation.
- **Improving the communication** in an organisation, when people from one organisation are training together.
- Encountering **new people** and creating new networks.

This form of residential existence is beneficial for the training process, provided a few guidelines as follows. It is necessary to ensure that all the participants are staying overnight at the same place to enable everybody to participate in the same way. A common problem for trainees at an international/intercity event in their city or town is removing themselves from their normal routines and avoiding personal or professional distractions.

Stages of Group Development

As a basic starting point, each training group is different. Every group is constituted by different individuals, coming from, perhaps, many different organisations and a range of cultural, social and educational backgrounds. People arrive with their professional and personal expectations, with their values and prejudices, their hidden agendas and their personal luggage, which may be packed with more or less important things that keep them connected to their 'normal' world. All or any of these aspects can have a big influence on the group, the training process and the dynamics and evolution of group life. If every group is different, it follows that there are as many group dynamics as there are groups.

[Handbook for People Working with Youth Groups](#) provides us with this curve of group development stages:

⁹Council of Europe and the European Commission, T-Kit 6: Training Essentials, p. 81-82

FORMING	STORMING	NORMING	PERFORMING	UNFORMING
“Where are we? What is going to happen? Who are these other people?”	“Where is my place? Whom should I listen to? Why are you bossing me around?”	“Yes, we can do it!”	“We’ve already made it! Let’s do more!!”	“All will soon be over. We will say goodbye”

What is the role of the facilitator in each of these stages? Find the answers in our favourite handbooks for group facilitation. For more theoretical but very practical tips and hints about how group dynamics work, please, refer to [“Handbook for People Working with Youth Groups”](#), starting from page 43 and [T-Kit 6: Training Essentials](#), starting from page 81.

Below you will find some of our methods that we used in our training course to set the base for the group to continue with the general theme of the course.

A: METHODS FOR FORMING AND STORMING

We believe you did not skip the previous chapter about the groups and you know what to do in each stage of the group development. But, if you did,... check out what happens in different group stages before you move on.

In this section (A) you will learn what methods we used for the group to form and storm and maybe find some inspiration for your training methodology. So, this is how we did it!

A1: GETTING TO KNOW EACH OTHER

A1.1 NAME GAME “2, 4, 8”

Materials needed		None
Instructions		First, people meet in pairs, get to know each other's names by heart. Then, two pairs meet and they have to know each other's names. After that, two groups of 4 meet together and learn 8 names. Eventually we meet in the group and someone is asked to tell all other names of their team. And maybe someone know the names of all the group members? Ask them to name them out loud.
Duration		10 minutes

A1.2 ICEBREAKER: “ZOMBIE GAME”

Materials needed		Chairs for each participant + one extra, music for better atmosphere
Instructions		<p>A strategic game where group has to prevent one player from sitting down on a chair. Game was played in two levels – on the first level there was one “zombie” (one chair) playing against the group and on the second level – two “zombies” (two chairs).</p> <ol style="list-style-type: none"> 1. Prepare the room. Chairs should be placed anywhere in the room in a random order, facing random directions. Make sure there is enough space to walk in between the chairs and sit down, if needed. 2. Ask participants to sit down on one of the chairs (one chair should be left empty). 3. Present the situation, that this is a village, everyone lives in one house, but there is one house empty. You got news, that a zombie is coming to the village and is willing to take over it. The group has to make sure that the zombie will not sit in an empty chair. Main rules: one person on one chair at a time, no touching of the zombie, no moving of the chairs in any direction, zombie walks in a slow pace. 4. Their aim is to protect the village from zombie taking over for a minute. After a minute zombie leaves. 5. Give a minute to prepare, when ‘zombie’ is away and not listening (by the way, your are the zombie!) 6. Play some loud music (some Ghost Busters theme music maybe?) and start walking around in slow pace trying to take over any free chair. If group does not succeed from the first time, give them another minute to rethink their strategy. Then, try again. <p>Exercise is concluded with reflecting on emotions, group process and individual efforts to the success of the whole group.</p>
Duration		20-40 minutes

A1.3 GROUP BUILDING ACTIVITY: “THE GROUP CHALLENGE”

Materials needed		Paper to register the tasks and other traditional training materials at your choice
Instructions		<p>This activity aims to build a positive and effective working environment and a sense of the group as a team.</p> <p>Objectives:</p> <ul style="list-style-type: none"> - To interact directly with all the other participants - To touch on topics related to the Training course - To get to know the space <p>Preparation</p> <ul style="list-style-type: none"> - Tasks for Mission Impossible on a flipchart or powerpoint - Music set up <p>Methods & Methodology (Step-by-step instructions)</p> <p>The participants get a list of tasks and are told that they have 45-60 min to accomplish them. The team then leaves the room and comes back after 45-60 min. The facilitators can use a buzz or create a sound that acknowledges the completion of each task. The tasks could be:</p> <ol style="list-style-type: none"> 1. Find out the names of all the personnel from the venue. 2. Count how many steps have all the staircases in the venue. 3. Find out what would be a popular local childhood game and play it in the team. 4. Make a list with what all of you would like to do in the evenings. 5. Build a human sculpture representing Youth Information. 6. Gather 5 eggs from the locals. 7. Find out which participant is the oldest and which participant is the youngest, which participants have birthdays on the same day, which have birthday in the same week and which in the same month. 8. Make a picture of all participants with a cow/boat/tree. 9. Make a group picture. 10. Make a short (3 min) parody theatre play using the words/concepts: yoga, toothbrush, inclusion, children and opera/ a legend/ a political breaking news. 11. Come up with 20 reasons why it is better to be in the venue rather than back at home, right now. 12. Create a map of the venue and close surrounding. 13. Find out what continent has been the most visited by the group. (except Europe of course!) 14. Make a list with each participant's favourite book. 15. Sing a song with your whole group. 16. Write and declaim a poem. 17. Build an origami. 18. Bring 10 pieces of wood. 19. Do 10 pumps each. 20. All of you need to hide during 10 min. 21. Write down ways of saying “Hello” in 10 different languages. 22. All of you change at least 1 piece of clothes with other people in the group. <p>After the presentation of the results and activity is debriefed. These might be some guiding questions.</p> <ul style="list-style-type: none"> - How do you feel now? - How did it work? How did you manage to accomplish those tasks? - What lessons can we draw from this experience? - Did you experience something that you would like to see happen again in this week? - Did you experience something that you would like to avoid in this week? <p>Steaming from the debriefing, the participants are asked to agree on ground rules for the group, establishing some guiding principles for the upcoming week to ensure a pleasant and respectful working environment.</p>
Duration		10 minutes

A2 : SETTING UP AGREEMENTS WITH THE GROUP

A2.1 AGREEMENTS WITH THE GROUP

Materials needed		A4 sheets of paper, colours
Instructions		<p>Ask participants to get together in teams of 3 and come-up with at least 2 proposals per team, what should be the Agreements that all group members should agree on and follow through the training course duration. The agreements should help the group feel good and work effectively.</p> <p>Each time a team shares their proposals, write them down on a flipchart paper and ask if all the group agrees with them. Leave the list open and come back to it every morning.</p> <p>You can even ask participants to sign their names under it.</p> <p>Examples could be: silent hour, one person talking at a time, etc.</p>
Duration		15-25 minutes

A2.2 “THE GROUP PROMISE”

Materials needed		1 poster/ flipchart paper, markers
Instructions		<p>This activity is recommended. The session aims producing a collective promise what the group will do to make the best out of their time together.</p> <p><i>What are we going to do together and what are the basic principles that will guide us?</i></p> <p>Objectives:</p> <ul style="list-style-type: none"> – Establish a sense of belonging to a (learning) community about to embark on a collective journey. – Value the opportunity of self-regulating participation. – Expressing and clarifying personal needs within a group <p>Directions:</p> <ol style="list-style-type: none"> a. Explain participants that a ‘group promise’ puts together the commitments that we, as a group, are willing to make so each of us can get the most of the time we spend together. A ‘group promise’ can always be revised, especially when one can’t keep promises. b. Write “Group Promise” on the top of a flipchart paper. c. Ask participants to think of one word expressing a need they have to feel safe and comfortable in a group. d. Once they all have their word, ask them to say it one by one. If everyone agrees with it, write it on the flipchart. Make sure everyone agree on a common meaning of the word. You will probably get several time the same idea, so agree on one word that will express it. e. Once everyone shared its word, add some, if necessary, or address specific rules that would need further discussion in a group of young people (as reaching an agreement about how to spend their free time after the training, alcohol consuming, cleaning the space, etc.) f. Read all the words aloud, till the list is complete. g. Ask for general consensus about abiding by the group promise. h. Post the contract in the room where it is visible to everyone. If the group is meeting for multiple sessions, remember to bring the contract to every session. i. Tell the group that everybody is free to come back to the promise whenever they feel something needs to be discussed. <p>Reference: Adapted with permission from the “EPTO Manual Potential for Life©”, 2017</p>
Duration		15-20 minutes depending on the group size

A3 : ENGAGING THE GROUP IN THE TRAINING PROCESS

A3.1 THE ACTION MATRIX

Materials needed		Flipchart paper, markers
Instructions		<p>Prepare a table of voluntary responsibilities by days and ask participants sign their name in the matrix:</p> <ul style="list-style-type: none"> - On Time person (who keeps the timing, makes sure people come on time); - Cleaning up the place at the end of the day and makes sure the place is ready the next morning; - Energizer person (suggests a short energizer when group is in need); - Social media guru (a short impressions/wrap-up of the day, maybe a picture or GIF, that can be posted to the social media).
Duration		5 minutes preparation, 5 minutes signing up

A3.2 HOPES & FEARS & CONTRIBUTIONS

Materials needed		Post-its of 3 colours (3 post-it – 1 from each colour per participant), 3 flipchart papers
Instructions		<p>At the beginning of most workshops, participants may walk in with a certain amount of anxiety or even fear, and need to be put at ease. An “icebreaker” exercise, right up front, can help reduce this anxiety and set a comfortable and accepting tone. The purpose of this activity is to allow participants to indicate for themselves, in a private and confidential way, their expectations, fears (what to avoid) and contributions about workshop issues. It also allows the participants to introduce themselves, which will help involve them more fully in the workshop.</p> <p>Objective: to link the module to the needs of the participants.</p> <p>Directions</p> <ol style="list-style-type: none"> 1. Distribute 3 post-its of different colours to each participant. Instruct participants not to put their names on the cards. 2. Ask participants to write on post-its what they would like to get out of the workshop. These are the “hopes” post-its. Ask participants to write one “hope” per post-it. Specify the colour that will be used for “hopes.” Explain that the “hopes” represent what each participant wishes, expects for, or would like to see happen in the workshop. 3. Ask participants to write their “fears” on the other colour. 4. Ask participants to write the “contributions” on the other colour. Explain that the “contributions” represent what each participant gives, does for, or how could they contribute to the programme or well-being of the group. 5. Ask the participants to put the post-its directly on the chart paper under the columns of hopes, fears or contributions. 6. As each participant reads aloud the post-its, the facilitators can chart responses, generating a list of “hopes”, “contributions” and a separate list of “fears”. Read aloud the three lists that you have on the chart paper. 7. Process the activity by discussing some or all of the following questions.

		<p>Discussion questions</p> <ol style="list-style-type: none"> 1. Did you notice any common themes as participants read the “hopes”, “fears” and “contributions” on the cards? 2. Were there any commonalities in the kinds of information people revealed on their cards? 3. Does some information seem safer to reveal because it is an anonymous activity? Which ones and why? <p>Facilitation Tips</p> <ul style="list-style-type: none"> – Instruct participants not to put their names on the cards. – Important to explain clearly what “hopes”, “fears” and “contributions” mean in this activity. <p>References</p> <p>Adapted with permission from © Warren J. Blumenfeld, ed., Homophobia: How We All Pay the Price, Boston, Beacon Press, 1992. (You can find it in the “EPTO manual for peer trainers”/ “Wants and Fears Card Activity”).</p>
Duration		30 minutes

A4. REFLECTIONS AND PROCESS MONITORING

When you engage participants into a learning process (and whatever the duration of the workshop), that might be useful to regularly check in about their feelings, skills and knowledge.

Most people think of monitoring and evaluation as the same thing, but, in fact, they are 2 distinct processes. While evaluation typically takes place at the end of a project, monitoring, on the other hand, is an ongoing process. There are occasions when it's not practical to both monitor and evaluate, for instance, if your engagement with the participants is very brief. However, a better way to see monitoring is as your friend. Just like any good friend would point out things you may have not thought of, monitoring allows you to see a bigger picture and make proactive decisions about your work.

At this stage, you may even be asking yourself: why should I spend time monitoring and evaluating? The reason is that monitoring and evaluation are incredibly

useful when it comes to ensuring your progress and performance as they can alert you to any changes you need to make. It has to be said that gathering information may initially feel like an extra activity, but if managed well, it will save you much time in the long run and help you achieve better results. Also, neither monitoring nor evaluation have to be complex. Sometimes the only monitoring you wish to use is to ask participants about their energy levels so that you can decide when is a good time to take a break. And likewise for your evaluation – you should only evaluate as much as you can reflect on and be mindful of people's time.

Surely, there will be times when the information you receive isn't exactly what you were hoping to hear. For instance, you may find out that your workshop was only enjoyed by 50% of your audience or that someone didn't find the project very appealing. But don't let this discourage you! Gathering feedback is there for a reason – to help you improve what's not working too well and to create a better match between your intentions and the real world.

Here are some examples of activities we used as a daily monitoring routine during the training course. We called this moment “Check-Out” and it was proposed at the end of the day; it was usually brief as the participants got tired. There is an infinity of possibilities for such activities and creativity is always welcome.

A4.1 UNDER THE CLOUDS

Materials needed		Coloured sheets, scissors, felt pen, sticky paper
Instructions		<p>The purpose of this activity is to assess in a fun way the state of mind of the participants. It can be presented at any time during the workshop (at the beginning, in class, at the end of the day). It also allows participants to verbalize what they feel at a specific time during the training.</p> <p>Process:</p> <p>Cut several coloured sheets into the shape of clouds. On each cloud, write an adjective corresponding to the state of mind in which the participants could find themselves during the workshop: for example, amused, motivated, curious, tired, disappointed, satisfied, etc.</p> <p>Ask each participant to place themselves under the cloud that expresses the state of mind in which they find themselves. The facilitator also participates.</p> <p>When everyone is in position, invite participants to look at the other members of the group.</p> <p>Invite participants who wish to express themselves by words of mouth. To do this, use the following questions.</p> <p>Questions for discussion:</p> <ul style="list-style-type: none"> – Does anyone want to explain why they chose to be under such and such a cloud? – Do clouds express well your state of mind? Do you see another term that would more closely reflect your state of mind? – In general, what do you think of the day/workshop? <p>Reference: Adapted with permission from “EPTO Manuel pour les Formateurs par les pairs”, 2014 based on ADL, A World of Difference® programme</p>
Duration		Between 5 and 15 min

A4.2 SCULPTOR AND CLAY

Materials needed		Empty space
Instructions		<p>This activity enables participants to express their feelings in a creative way. It is useful at the beginning or at the end of session, to get a sense of the group mood.</p> <p>Directions</p> <p>Ask participants to make pairs, in which one person will make a sculpture from the other person's body, answering the question: How are you feeling today? When everyone is ready, have each pair present their work or use the discussion questions below.</p> <p>Then switch roles in the pairs so that the sculpture becomes the sculptor.</p> <p>Discussion questions</p> <ul style="list-style-type: none"> - What do you see? How do you understand the sculptures? - Then ask the makers about their conception: what did you try to represent? <p>Facilitation Tips</p> <p>You can call the presentation round a small exhibition where every artist presents his creation.</p> <p>If the sculpture is not understandable, you can ask its maker to give it a title.</p> <p>References:</p> <p>Handbook of the FOTEL (Forum Theatre Against Early School Leaving) project: >>link</p>
Duration		10 minutes

A4.3 OSCAR SPEECH

Materials needed		No material and empty space
Instructions		<p>This activity offers a fun and cheering way to evaluate and highlight the results of an activity or workshop, using the tone of the famous Oscars ceremony where winners go on stage to express their reactions.</p> <p>Directions</p> <p>If you want to, you can set up in advance a nice scenery with a reading desk and chairs positioned in front of the “stage”, and have some celebration music going on in between the speeches of the participants.</p> <p>Here are some examples of speech templates where blanks have to be filled in by each participant according to their own experiences. Choose in advance 3 or more sentences from the list to create an Oscar speech model that each participant will use:</p> <p>“I would like to say thank you ... for ...”</p> <ul style="list-style-type: none"> - “This workshop/training really helped me to ...” - “The best moment for me was when...” - “I am so happy to ...” - “This was a great opportunity to ...” - “I am honoured to ...” - “I am so pleased to ...” - “Before the training I felt/thought ... but now I feel/think ...” - “I am satisfied, because ...” - “My peer education project will be super successful, because of ...” <p>Ask each participant to go one by one to the designated spot in the room to give their speech. Invite participants for a round of applause after it. Repeat until everyone has given his/her speech.</p> <p>Facilitation Tips: As a facilitator, you can start with your own speech to initiate the process.</p>
Duration		1 to 2 minutes for each speech

A4.4 EVALUATION OF A WORKSHOP: THREE, TWO, ONE CLOSING ACTIVITY

Materials needed		Three, Two, One Closing Activity worksheet, 1 per participant
Instructions		<p>This activity brings closure to the workshop and gives some evaluative feedback to the facilitators. The questions encourage participants to reflect on what and how they will use what they have learned, and to ask questions. The programme is summarised and participants are asked to evaluate the programme, its content and applicability to their individual and organisational needs.</p> <p>Directions:</p> <ol style="list-style-type: none"> 1. Distribute Three, Two, One Closing Activity worksheet to participants. 2. Tell participants they will have approximately 10 minutes to write responses to the questions. 3. If time permits, elicit a few responses to each category, starting with “What did you learn today?” You can also ask participants to share in pairs, triads, or quads. <p>Discussion Questions:</p> <ol style="list-style-type: none"> 1. What have you learned as you completed your responses to the worksheet questions? 2. What will be the most lasting impact of this workshop for you? <p>Option: Collect the worksheets as an evaluation form.</p> <p>Reference: Adapted with permission from a workshop presented at the annual meeting of the National Staff Development Council. Permission to use granted by the National Staff Development Council, ©1994.</p> <p>(prepare an A4, leaving blank space for each of the following questions):</p> <p>THREE, TWO, ONE CLOSING WORKSHEET</p> <p>In reference to today’s programme, please complete the following:</p> <ol style="list-style-type: none"> 1. Three things you have learned... 2. Two things you will use... 3. One question you still have...
Duration		15 – 30 minutes, depending on time allotted for the sharing of responses

B: DISCOVERING YOUTH INFORMATION

You have the background on youth information from INTRODUCTION section. Now it is time to explain it to your participants. Refer to the documents if needed or eryica.org website for more information and resources.

B1: TOOLS TO INTRODUCE YOUTH INFORMATION IN GENERAL AND THE YOUTH INFORMATION CENTRES

B1.1 “ACTIONBOUND ON YOUTH INFORMATION”

Materials needed		Preparation of a quiz or ActionBound, one mobile device per team with ActionBound app installed.
Instructions		<p>Prepare a creative game for small teams using the ActionBound app. You can check for inspiration for the questions and tasks in this ActionBound: https://actionbound.com/bound/P2PBerlin</p> <p>The tasks may include:</p> <ol style="list-style-type: none"> Think of and make a photo of a living sculpture that would symbolise your team. What does GENERALIST YOUTH INFORMATION WORK stands for? <ol style="list-style-type: none"> Services offering “specialised” information for young people e.g. housing support, job advice etc. User-centred approach of youth information, which covers all topics that interest young people. Responding to the needs of young people in a way which enables them to have a maximum of choice and which respects their autonomy and anonymity. A confidential physical area offering information to young people that is relevant to their lives. The information provided depends on the needs of young people. Involving a third party (from within or outside the YIC) in the work with an individual. Read and study 9 principles of the European Youth Information Charter. Which principle (number of it) is explicitly targeting youth involvement in the youth information work? Correct answer: 6. Which of these principles of the European Youth Information Charter does your team like to most? Be ready to tell us why! ;) Find a person who is working/doing internship in the office of the European non-profit organisation, which takes care of youth information service development, and make a selfie with him/her/it. (if that is feasible in your case) What for does this definition stand? “Providing requested information without recommendation regarding use, assessment or appropriateness.” <ol style="list-style-type: none"> Informing Advising Counselling You are an advertisement agency contracted to prepare an ad on peer-to-peer involvement in the youth information. Name three reasons why youth information services (such as YI centres) should involve young people in their service delivery and tell them aloud to the camera in 30 seconds. So what is the abbreviation (title in short) of that organisation which takes care of all youth information centres in Europe? Type the name in capital letters. Correct answer ERYICA. Choose the statement that is correct for peer-to-peer activities in youth information work: <ol style="list-style-type: none"> Content provided by youngsters must stay untouched by the youth information worker. It is easier to organise peer-to-peer activities in the bureaucratic organisation. Peers should not be seen as counsellors of other young people. Watch the movie and discuss: what are the main qualities of the Eurodesk network. Record an audio of your discussion here. Make it no longer than 60 sec. Video on Eurodesk Find or google the closest Eurodesk relay in your region/country and write them down here. <p>Divide the group in teams of 2-3 people, give them QR codes with ActionBound link (or introduce the tasks in a different format at your choice). Give time for participants to implement the tasks.</p> <p>In ActionBound, you can see the results online. Spend some time showing the results to the group and wrap up with the main aspects and facts about youth information. Ask participants to reformulate what is youth information in their own terms.</p>
Duration		<p>45 minutes to implement the tasks</p> <p>15 minutes wrap-up</p>

B1.2 “HOW TO SET A YOUTH-FRIENDLY PRESENTATION OF THE YI CENTER”

Materials needed		Projector, papers and other creative materials of your choice
Instructions		<p>If your participants are coming from different towns and info centres or even from different countries, then it would be great to ask them to learn more about their youth info centres and talk to their youth information workers in order to prepare the presentation about the activities they do. Ask them to do it as a homework task and to present it during the training course for the whole group.</p> <p>You can ask them to map the place where info centre is located on a whiteboard (imaginary map)</p> <p>TASK:</p> <p>Each person/team representing one info service has up to 5 minutes creative presentation, briefly answer the questions and mark their organisation in the map:</p> <ul style="list-style-type: none"> - Name of the organisation; - Who is the target group; - Where it operates; - What youth information topics it covers; - What methods it uses; - What facilities it has; - Do they have youth peer-to-peer network? If yes, what do they do?
Duration		<p>Home task preparation</p> <p>During the training course – 5 minutes per each organisation/team</p>

B2: TOOLS TO ADDRESS SPECIFIC TOPICS IN THE FIELD OF YOUTH INFORMATION

In this section, we want to introduce you the 3 tools our project developed for youth information services. They are peer-delivery friendly, and we encourage to introduce them to your participants. Nevertheless, if you have your own methodologies you want to introduce that keeps with the youth information services, you are free to do it!

So during the training course we got hands-on! First, we gave our peer-educators to experience the tools as participants and only afterwards they planned how to use them in their practice activities (future info sessions).

B2.1 ORGANISING A ROLE-PLAY ABOUT DATA PROTECTION “PARENTS MEETING”

Materials needed		Preparing the materials described in the method description
Instructions		Read carefully through all the instructions of the method description and make sure you have enough time to prepare (print out handouts, etc.) Detail instructions and downloads
Duration		1 hour for preparation 2 hours to implement

B2.2 “ORGANISING A WORKSHOP ON YOUTH EMPLOYABILITY”

Materials needed		Print handouts, prepare the setting according to the instructions
Instructions		This method is combined of several different subtopics and tools. So, make sure you have enough time to prepare for everything and make a little local research on various employability opportunities to present to the participants. Instructions and printouts
Duration		1 hour for preparation 1,5 hours for implementation

B2.3 “ORGANISING A SESSION ABOUT MOBILITY OPPORTUNITIES FOR YOUNG PEOPLE”

Materials needed		Wi-Fi connection and mobile devices or laptops
Instructions		This tool is an online test tool. But it is up to you to make some introduction about various types of mobility activities or bring the group in the discussion. Afterwards make a test together. Depending on the results, people can group with one who received the same highest score as a result. Ask the group to share what they would take as a next step to get more info about their particular mobility opportunity. You can also try mobilizing the resources within the group: asking if some people had a real-life experience of one of those mobility opportunity and act as a resource person for the group. And if other would have a piece of advise or links to an organisation/website that could help gathering more info. Instructions
Duration		10 minutes for preparation 10-40 minutes for implementation

C: LEVELING-UP WITH PEER EDUCATION

Even though the knowledge about youth information and various topics is very important, the main competence this training course is bringing to youth and youth information workers is the understanding what is peer-to-peer education and the possibility to practice facilitation tools with groups, e.g. implement an info session. These activities will allow participants to experiment in a safe environment and see what they are good at and where they want to improve.

C1 INTRODUCING THE CONCEPT OF PEER EDUCATION

C1.1 “LIVE AN EXPERIENCE OF PEER EDUCATION-EXPEERENCES©”

Materials needed		Flipchart papers, post-its, a large board (to stick participants' post-its)
Instructions		<p>This experiential activity offers an easy way for participants to explore and understand peer education. It is a practical and interactive introduction for people who do not know what peer education is or know little about it. It enables the participants to experience peer education through simple group processes and to easily achieve a collective definition, which is meaningful and insightful. If done in its entirety, it is also a good introduction to the topic of competences and how they are developed by peer education, which could be referred later on in the module.</p> <p>Objectives</p> <ol style="list-style-type: none"> 1. To explore in an experiential and practical way what peer education is (PART A); 2. To understand and agree on what peer education means; 3. To introduce the concept of competences and link it to peer education. <p>N.B. Part A and part B can be done independently.</p> <p>Directions</p> <p>PART A</p> <ol style="list-style-type: none"> 1. Introduce the activity by stating its objectives and informing the group that they will go through several steps. Give a personal example of peer education: A teaches something to B. It works even better, if you can teach something to your co-facilitator in front of the group. For instance: a dance, a song, a yoga posture, a tongue twister, a game... (5') 2. Then form X groups of Y participants (even numbers), in which 1 person teaches something others. This person has to make sure that the others learn how to do it, but are also able to teach it other people afterwards. (30') 3. Then form Y groups of X (in these new groups, there should be 1 representative of each previous group), in which people share the things they learned in their previous groups. (30') 4. Invite those groups to have a discussion around the following questions: How did peer education happen in the learning process? From the experience you just had, what do you think peer education is? (20') 5. Reconvene the whole group to hear answers and inputs from all the groups. You do not necessarily have to hear all the topics each group talked about, you can also only ask for add-ons every time a group spokesperson has finished. Make sure that you or your co-facilitator takes notes of important keywords on a flip-chart while each groups answer (20').

- Then, depending on the key-words and elements of definition you have collected, add the aspects about peer education that the participants may have missed or forgotten. You should achieve a clear and insightful definition of peer education. You can also provide 1 or several “official” definition(s) of peer education, using the Toolkit for quality peer education. You can end up the activity here or continue with Part B.

PART B

- Instruct participants that you want them to answer the following questions individually.

Introduce personal examples to illustrate possible answers to the questions above and help them in their personal reflection (30’):

Who are the peers in your life?

- Think about something positive you learnt from our peers.
- Think about something negative you learnt from your peers.
- Think about something positive you taught your peers.
- Think about something negative you taught your peers.

Optional: introduce briefly the concept of competences, using the ASK model: competences = attitudes + skills + knowledge (at this stage, it’s not essential that the participants have a total understanding of what a competence is) and add this last question: What competences have you developed through these experiences with your peers?

- Make groups of 4 (preferably people who were not in the same groups in the previous steps and haven’t talked to each other yet) and ask participants to exchange their answers. Ask each group to write down all the competences they have identified on post-its (1 competence per post-it). (40’)
- Collect all post-its by asking a representative of each group to stick them on a board while reading them aloud. You can cluster the similar ones. (20’)
- Have a whole group discussion about the process (not yet on the post-its/competences), using the following questions.

Discussion questions

- How was it to reflect on your past experiences?
- What experience(s) was/were the most difficult to identify?
- How was it to share these experiences in groups?
Extra-questions, if you introduces the part on competences:
- How was it to reflect on the competences you developed?
- What are you reactions on the competences that were identified? Are you surprised?

Facilitation Tips

It’s important to keep a good track of the time in this activity because there are several steps take in several groups configurations. If you co-facilitate the activity, the other facilitator can be the time keeper.

C2 WHAT ARE THE QUALITIES REQUIRED TO BE (COME) A PEER EDUCATOR?

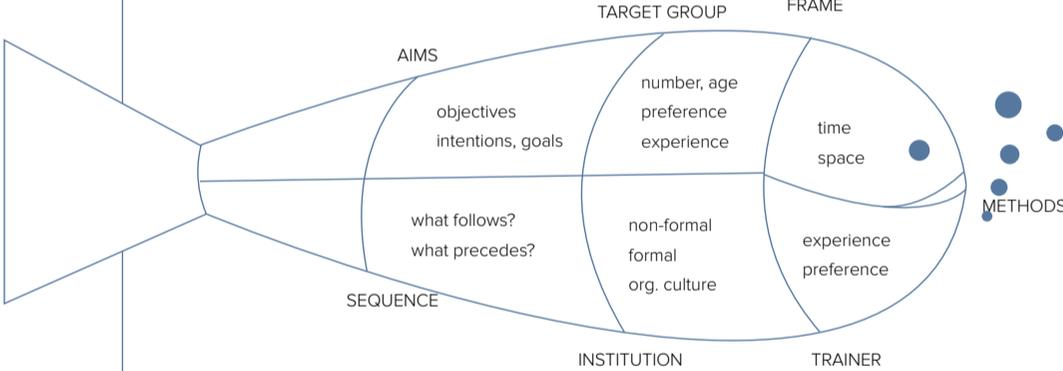

C2.1: THE IDEAL PEER EDUCATOR

Materials needed		Flipchart papers, markers
Instructions		<ol style="list-style-type: none"> 1. Tell participants that they will be asked to reflect on what would be the attitudes and skills of the ideal peer educator. 2. Divide the group in teams of 4 people and handout a piece of chart paper and markers to each group. 3. Ask participants to share with their partners what they think would be the characteristics of the perfect trainer. 4. Then tell them to draw a character, the perfect peer educator, on the chart paper representing his characteristics using drawings, colours and symbols. Give them a couple of examples to illustrate the direction. 5. Give them 30' to do that and ask them to choose one person in each group who will present the character. 6. After 30' reconvene the whole group and let each group present its character. 7. List the skills and attitudes on a chart paper and add some if necessary. 8. Complete the list if major skills are missing. <p>References: EPTO, Toolkit for Quality Peer Education, 2016. AEGEE-Europe (Association des Etats Généraux des Etudiants de l'Europe). NFE BOOK. The impact of Non Formal Education on young people and society.</p>
Duration		60-90 minutes

C2.2: PREPARE THE CO-FACILITATION “SUPPORTER-SUPPORTED”

Materials needed		A large room for couples to stand with their arms spread
Instructions		<p>This activity helps participants understand how difficult it is to support and get supported, if you cannot talk. It also creates an awareness about own support needs and how one would react when supported without having asked for it. Supporter’s support is often used during train-the-trainer seminars in order to create awareness in working with a co-facilitator.</p> <p>Directions</p> <ol style="list-style-type: none"> 1. Ask participants to form couples. If you have an uneven number of participants, either allow for one group of three or have one of the facilitators join. 2. Instruct participants to choose the person who starts. This person will be supported, close his/her eyes and stretch out the arms like a T. The other person is supposed to support the T for the next 5 minutes without talking, just by assuming when the T needs support. 3. After five minutes the roles change. The supported become the supporters and vice versa. 4. After 10 minutes debrief the activity. <p>Discussion questions</p> <ol style="list-style-type: none"> a. To when you were supported: How did it feel? Were you helped too early/late/just in time? b. Did you realize what you were expecting? Did it happen? c. To when you were supporter: What was your strategy to support the T? d. To all: What did you learn during this exercise? e. What do you think you could learn from this exercise when it comes to supporting others/ asking for support/ co-facilitation? <p>References:</p> <p>EPTO, Manual for Peer Trainer, Diversity and Anti-Discrimination©, ADL-A world of Difference programme© 2018.</p> <p>AEGEE-Europe (Association des Etats Généraux des Etudiants de l’Europe). NFE BOOK. The impact of Non Formal Education on young people and society.</p>
Duration		15 minutes without debriefing

C2.3 PEER-TO-PEER PRACTICE

<p>Materials needed</p> 	<p>Simple postcards/pictures to cut, flipchart, markers, A4 papers, pens, colours</p>
<p>Instructions</p> 	<p>Introduction</p> <p>Start with creating the facilitation teams (max 4 participants per team); we prepared the teams and cut postcards with their names into a puzzle. They take their names and create full pictures - they form their teams.</p> <p>Present the task: to prepare a 30 minute workshop (strictly not longer) for other peers in one of the topics:</p> <ul style="list-style-type: none"> - data protection and privacy; - mobility; - employability; - choose one from the three <p>(each team picks the task randomly. NOTE: you can choose your own topics according to your local needs).</p> <p>Requirements for the result:</p> <ul style="list-style-type: none"> - strictly not longer than 30min (including introduction, the content delivery, wrap-up); - everyone in the team has to be on 'stage' ¼ of the time (if you have 4 people per team); - you can use all the materials that are here plus the manual; - you can use, adapt change the TOOLS or create your own ones! Be creative! - Every workshop has an aim - and you should try to achieve it! <p>Present the FISH model (p. 53) how to choose a method that serves the group for a workshop. Emphasize that there are different aspects you have to take into consideration while preparing for a workshop.</p>  <p>Give first 10 minutes in the team to discuss and agree on:</p> <ul style="list-style-type: none"> - aim and goals of the activity; - foreseen results of the activity; - skills, knowledge, attitudes – what they want to develop in their participants during their workshop? <p>Ask each team to present them aloud and provide feedback to them – whether the aims and goals are clear and match the foreseen results and develop the foreseen competences.</p> <p>Provide links to the 3 TOOLS or, if you have your own tools, links to them, paper handouts, etc.</p>

		<p>Preparation</p> <p>The rest of the time participants can think how they will reach the aims and achieve results in 30 minutes.</p> <p>Later on mentors will join them (if you have adult youth information workers joining the training course).</p> <p>Participants plan time themselves.</p> <p>Present the time schedule when workshops will be delivered.</p> <p>Give time for preparation in teams. Be available as a consultant.</p> <p>Afterwards, every team delivers their workshop to the rest of the group. Count time (not more than 30 minutes per team). After all, teams deliver their workshops, make a proper evaluation round.</p> <p>Evaluation</p> <p>Sit down together in a circle and reflect on following aspects:</p> <ol style="list-style-type: none"> 1. Team members say: 4' <ol style="list-style-type: none"> a. Feeling/emotion? b. What they would keep (liked)? c. What they would change next time? 2. Mentors say: 1'(if you have those) <ol style="list-style-type: none"> a. How was the team process and your role in it? 3. Provide feedback on peer-to-peer and youth information work aspects and also on the common structure of the workshop
Duration		<p>Introduction: 60 minutes</p> <p>Preparation: 90 minutes</p> <p>Delivery: depends on how many teams you have – team x 30 minutes</p> <p>Evaluation: 60 minutes</p>

C2.4 MENTORING PEER GROUPS

Materials needed		Handouts, projector
Instructions		<p>While young people are preparing their topic, you can use this time to work with adult youth information workers and prepare them for the mentorship that is waiting ahead.</p> <p>We recommend to work on real needs and experience of the youth information workers during the session and create space to share their experience.</p> <p>The recommended structure of such session:</p> <ol style="list-style-type: none"> 1. Presentation of Toolkit on quality peer education. Make sure you choose the parts that are actual to the youth information workers and together reflect on the following questions: How to support the peer educators? How to support youth? 2. If you have people in the group that have already mentored to peer groups, ask them to share their experience or present some examples on peer projects (see the chapter 'Where do you find peer education' for some examples) 3. Explain their task of supporting the teams of youth that are preparing in the other room. They will be mentors for the actual peer groups while they will be preparing for the workshop. 4. Discuss their role: Supporting vs Doing for them (Aspects to pay attention: team work, time management, formulating the aim and choosing the activity, sharing the responsibilities, materials needed, bringing awareness about the different styles in preparation, raising awareness in the need of the group) 5. Go through the sheet on how providing constructive feedback (see in the chapter about feedback of this manual) 6. Let them go join their teams of peer educators
Duration		2 hours

C3 HOW TO ORGANISE YOUR OWN PEER EDUCATION PROJECTS

C3.1 “THE PROJECT RIVER”

Materials needed		1 flipchart paper for each team, markers and colours
Instructions		<p>This activity helps participants to achieve a big picture of their peer education project (practice) by drawing, using the metaphor of a river. During the training course we expected that young peer educators will implement local info sessions with their peers as a practice task. This activity is meant to plan this kind of peer practice. While creatively drawing and having fun, this activity allows them to start planning the different phases of their project and anticipate important aspects of its implementation.</p> <p>Directions</p> <p>Tell participants that they will gather into “project teams” and draw a river on a flipchart paper, symbolizing their peer-to-peer local youth information project from now to the end (until they reach their final goal).</p> <p>Optional: ask participants to draw 1 spring per team member on the paper, symbolising their inner resources and personal drive(s) that feed the project river and describe the participants’ personal motivations.</p> <p>Invite participants to complete their river by drawing elements representing the following aspects:</p> <ul style="list-style-type: none"> – The different steps and milestones of their project (for example as little boats, bridges, etc.); – The threats and difficulties they might encounter during their project (for example as rocks or whirlpools);The resources and supporters they might find on the way. – Add any other necessary information that related to the participating info centres and their requirements for activities. <p>Allow 30-45 minutes for the whole drawing part.</p> <p>Tell participants that after drawing, their team should present their project river to the rest of the group.</p> <p>References:</p> <p>EPTO, Toolkit for Quality Peer Education, 2016.</p> <p>AEGEE-Europe (Association des Etats Généraux des Etudiants de l’Europe). NFE BOOK. The impact of Non Formal Education on young people and society.</p>
Duration		2 hours

D: FACILITATION TIPS

This chapter might be useful to you as a trainer leading this training course and as a resource you provide to your participants. So, dig deep and get prepared for any facilitation situation!

D1. HOW TO BUILD YOUR OWN AGENDA FOR A WORKSHOP

D1.1: ACTIVITY TO SET UP THE OVERALL OBJECTIVE OF YOUR WORKSHOP

The smart guys, who wrote ‘[Handbook for People Working with Youth Groups](#)’, say that “different methods help a trainer do specific pedagogical interventions. Methods are tools one needs to know how to use and to be able to use. There are no good or bad methods. A method is only effective when it is used at the right time and in the right place.

In order to select methods and to successfully use them, it is necessary to have clearly formed goals of the group and/or the team of group leaders. The goals need to be adapted to the present situation (here and now). If there is no clear objective, group members find it more difficult to accept the method because they cannot understand its purpose.

Often, when the purpose of a method is not clear, the method is treated as a game and the pedagogical objectives of an educator are lost. Adopting a method means understanding its purpose, participating and gaining new experience. When working with young people, methods are used for individual development and social learning.

A method itself is by no means a goal and is not only a game. A team of group leaders and group members must take methods seriously as space for learning and experimenting. When putting methods into practice, a work atmosphere must be always maintained. A work atmosphere means a safe atmosphere where team members are able to get rid of their fears, gain new experience and learn from it. In order to learn, it is important to discuss the gained experience. Sufficient time must be devoted for

reflection as discussion is the main part of a method – it helps the participants perceive the experience gained and is the key for making the learning process successful.

When selecting methods and preparing a programme, it is recommended to consider these aspects:

- What are your specific educational goals, what are you trying to achieve?
- What topic are you working on? Are the links between the method used and the objectives of the activity clear?
- What experience do we have in using similar methods before?
- How specific is the youth group you are working with? What kind of experience does it have? What is its current situation (phase of development)? What interests and needs do the team members have?
- What are the conditions for using the method? Is the space and the environment suitable for work? What materials do you need and have? Will there be sufficient time?
- What educational activities/methods did you use before with the same group? What are you going to do after?

It is much easier to use a method if a person has experienced how it works him/herself. It makes it easier to understand what the group members are experiencing. But we encourage you to be brave enough to carefully try new methods – this is the only way for us and for the young people to gain new valuable experience. If you are not sure about the method you are using, you can be honest with the group and invite it to try a new method, then, discuss its advantages and the ways to apply it in the future.

The selection of methods must correspond to the principles of individual holistic learning.”¹⁰

Some elements to consider when designing a session¹¹:

- Make the objectives and role of the session in the program clear to the group. Understanding why an issue is being dealt with in this way at this point will help the participants to stay with the process.

¹⁰ Ž.Gailius, A. Malinauskas, D. Petkauskas, L. Ragauskas, “Handbook for People Working with Youth Groups”

¹¹ T-kit No. 6 “Training Essentials” (2002). Council of Europe and European Commission, Council of Europe Publishing p. 73

- While avoiding showmanship, use a variety of methods within one session. It will help you get the participants involved and keep their attention.
- Conclude the session. Usually, the participants' attention is high during the last minutes of a session, so underline the main learning points and make realistic links to the overall framework.
- Be aware of normal attention spans when designing your session. It will help you see what methods you need to use to keep the group involved. The graph below is basic and not a universal guide, but it does indicate likely fluctuations in attention and suggests that a trainer needs to pace the session and consider the impact of environmental and group factors on attentiveness.

Action time!

Try out a simple structure to design any workshop or session that we ourselves are using (in Word or Excel). Make a table and include as many activities as you are planning to implement. This is useful for you as a trainer or a peer group member – create a common plan with your team.

TIME (DURATION)	AIM/OBJECTIVE	EXPECTED RESULTS	METHOD DESCRIPTION	WHO IS RESPONSIBLE	MATERIALS NEEDED, COMMENTS
10'	To introduce...	Participants will learn....	Steps To ask...:	Tom	Projector, 3 pens...

D2. HOW TO ENSURE PARTICIPATION

D2.1 “THE LADDER OF PARTICIPATION”

We have seen that a peer education project is a path, a cycle in which young people can grow and develop their unique potential. To be meaningful, such a project requires the active commitment of participants throughout the process. Of course, this commitment depends first on each participant's willingness to engage. However, there are

ways to strengthen it and useful factors that can help us sustain participation in our project.

What is participation?

Participation is more than just being present in the same room with other people. To participate means to be involved actively.

When running a project, there are 2 distinctive approaches one can take: top-down or bottom-up. If your approach is top-down, you are exclusively responsible for designing and deciding about the project. In a bottom-up approach, the project is co-designed by participants and the responsibility for different parts is shared by several people. In other words, the former approach is about delivering a project TO people, whereas the latter is about delivering a project WITH people.

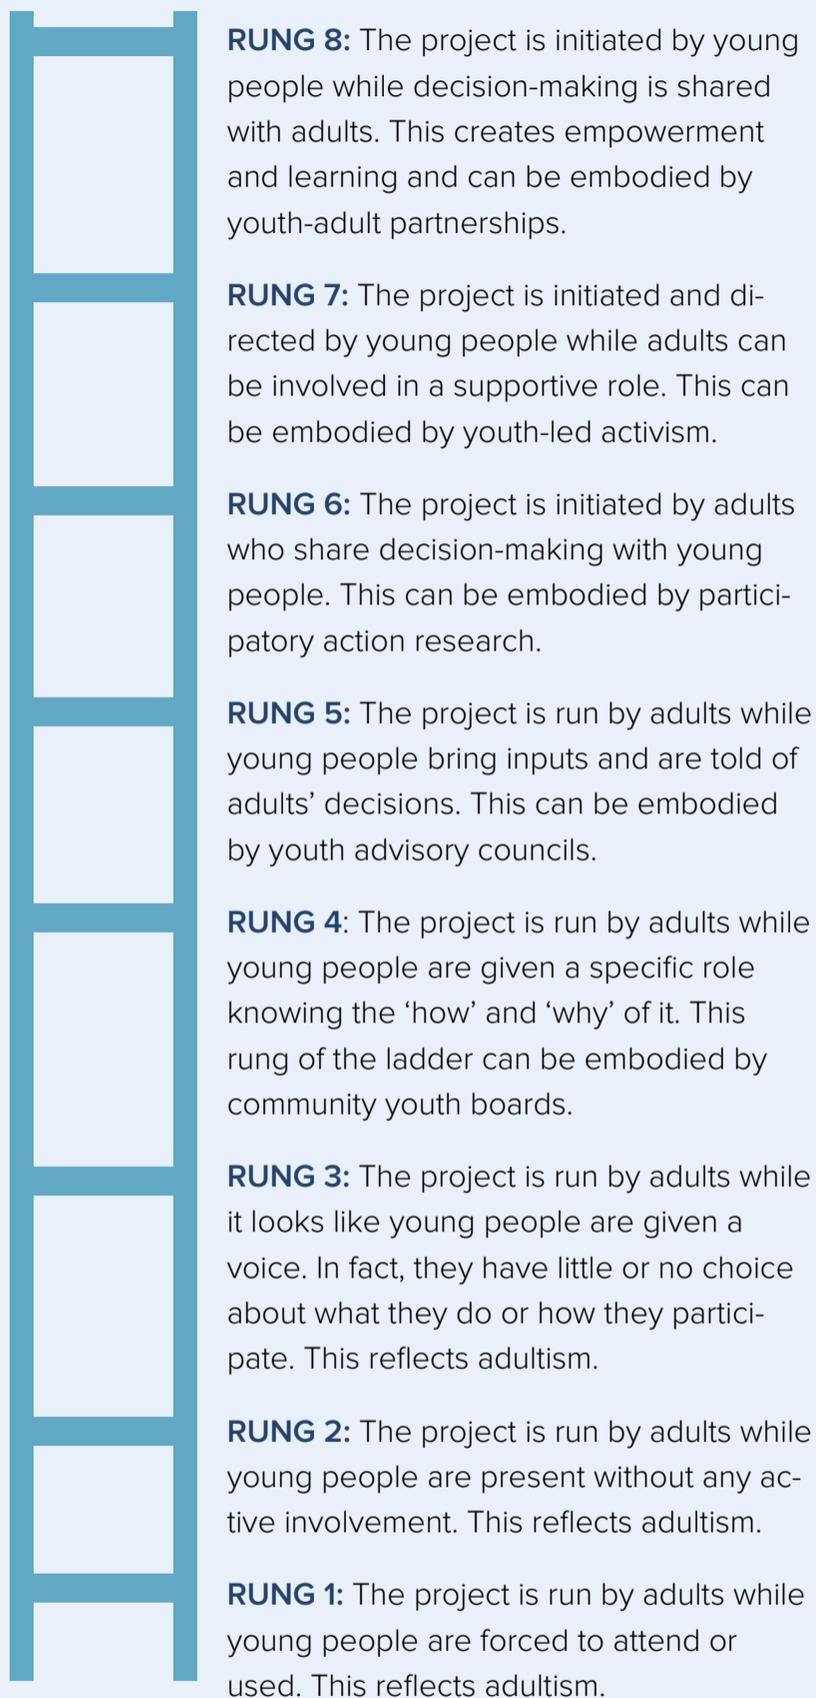

In an ideal world, every peer education project should be co-designed by your target group and participation should always be voluntary. There are, however, some situations where participants are only partially involved in the work. This may happen when your project is initiated by an external body (i.e. a teacher, a local council, a sponsor...). A classic example is delivering educational programmes without any prior consultation with the local community as to what skills, knowledge and format they would prefer.

The ladder of participation

The ladder of participation is a model originally developed by the sociologist Roger Hart, which proposes 8 levels of young people's participation in a project and can be used as a tool to measure their participation in your own peer education project.¹²

¹² Hart, Roger A.(1997) “The Theory and Practice of Involving Young Citizens in Community Development and Environmental Care”, Earthscan, London.

Degrees of Participation¹³

This model can easily be applied to peer education. It is sometimes abused by adults to get a moral justification for what they defined in a top-down approach: for instance, a prevention campaign only defined by adults with the

aim of telling young people what to do and using them as agents to deliver these messages. Or it can be used by adults to delegate to young people issues that they are co-responsible for, but don't want to take care of: for instance, mobbing in a school where only peer mediators have the responsibility to deal with situations that adults have let happen and/or failed to solve instead of having a balanced partnership.

On the other hand, it is important to note that the ultimate goal of a peer education project is not necessarily to achieve the rung 8 at each stage of its implementation. Even if this rung is considered ideal in terms of youth participation, other rungs might be more efficient and/or convenient at specific stages of the implementation. This model is mostly introduced here as a reflection tool on the meaning of participation in the field of youth projects.

D3. COMMON ISSUES IN LEADING GROUP DISCUSSIONS¹⁴

The following are suggestions to help ensure successful and efficient discussions. Included responses to some "what if's" facilitators might encounter. Remember, facilitators are not expected to have all the answers. The combined wisdom of the whole group is always greater than the wisdom of any one person.

What if...

A. ONE PERSON WANTS TO DO ALL THE TALKING?

1. Establish goals at the beginning of the session. State that one of the goals of the programme is to provide an opportunity for everyone to talk and listen.
2. You may have to interrupt. You can say, "Thank you, I am going to stop here so we have time for other responses."
3. Suggest the time limit for talking and ask for agreement from the group.
4. Humour sometimes helps, but be careful not to use humour at the expense of another person.

¹³ Adapted from http://www.learningtolearn.sa.edu.au/tfel/files/links/Ladder_of_Participation_1.pdf, by Adam Fletcher on behalf of the Freechild Project and EPTO Toolkit for Quality Peer Education, 2016

¹⁴ EPTO, Manual for Peer Trainer, Diversity and Anti-Discrimination©, ADL-A world of Difference programme®, 2018

B. PEOPLE AREN'T PARTICIPATING?

1. Use 3x5 note cards: There are a number of advantages to having participants respond to a question in writing first: (1) the cards serve as a “crib sheet” and allay the what-will-I-say anxieties; (2) you as the group leader can collect the cards and read the responses anonymously.
2. Share in pairs: Ask the participants to find a partner they may not know well and respond to questions in pairs. It is much easier to say something to one person than it is to a large group, and it warms participants up for large-group discussion.
3. Share in groups: You can create triads, quads, or other small groups to discuss questions and/or issues. Small groups can be less intimidating than the whole group, and give participants the opportunity to interact more closely with one another.
4. Model responses: Sometimes it helps people share, if they hear an example from you. Your sharing also makes you a part of the learning process.
5. Wait time: Give people time to think. If you interrupt a period of silence, you may convey nervousness that might be contagious. Remember: there are no quick answers to most of the questions asked.
6. Ask for clarification: Encourage people to talk by asking for more information.
7. Create a “safe” environment: Participants may not want to share, if they feel their ideas or opinions will be attacked. Be respectful of everyone and establish the ground rule that only one person talks at a time.

C. ONLY ONE POINT OF VIEW IS BROUGHT OUT?

1. Ask, “Does everyone agree with that statement?” Then ask others who seem to be disagreeing with the point of view what they think.
2. You can provide other information by saying “Let me introduce a different point of view; what would you think if...?”

3. Stand ups or hand raising: Say, “Raise your hand if you agree with the last statement.” Then you will have identified a group of people who didn’t raise their hands whose opinions you can seek.

D. MISINFORMATION IS PRESENTED?

1. Ask, “Does anyone think differently?” or “Does everyone agree with that statement?” If no one from the group contributes another opinion, it is up to you to present another view. Don’t let misinformation stand; it implies you agree with it. If you don’t know the facts, say so, and try to find out the correct information for future sessions.
2. Ask the participant “Where did you get your information?” Do so non-judgmentally or critically. Preserve the dignity of the person who provided that misinformation.

E. CONFLICT OCCURS?

1. Expect conflict and be prepared for it. Some of these issues bring up gut-level responses.
2. Recognise the possibility that you may be hesitant about confronting some bigoted remarks.
3. It is the facilitators’ job to “manage the traffic.” Sometimes “freezing” the moment, literally stopping all conversation, helps people to step back and look at what’s happening. This method can have the effect of removing the onus from two people engaged in a conflict, and offers an opportunity for the whole group to problem solve the situation. You can say, “Freeze! What’s happening here? What triggered this? What different opinions are being debated?”
4. Sometimes a conflict between two people has to be mediated privately. Whatever the outcome, it is important for the participants who witnessed the conflict to hear about the resolution, keeping in mind, however, that some things may have been shared in confidence and can’t be made public.

¹⁵ EPTO, Manual for Peer Trainer, Diversity and Anti-Discrimination©, ADL-A world of Difference programme®, 2018

5. Remind the group to stay focused on the subject at hand. Don't hesitate to say, "That's interesting, however, the question was..." or, "That's another important point, but let me remind you of what we were originally discussing."

D4. CONSIDERATIONS TO DEAL WITH POTENTIAL CONFLICT¹⁵

Listed below are a variety of strategies facilitators can use to resolve conflict:

Ground Rules

Establish ground rules or discussion guidelines at the start of the workshop. In general, people will manage their own behaviour to meet the expectations of the group. If the discussion becomes heated, a reference to the ground rules can be a tactful way to remind people of the behavioural expectations everyone in the room has agreed to.

Communication Skills

1. Listen for content and tone. Try to determine if the participants are angry, combative, or genuinely seeking answers. If a participant is angry, the facilitator will have to create an opportunity for the participants to move from an emotional to a rational state.
2. Do not interrupt the participant. Listen to what he/she has to say before responding.
3. Let the participant know that you are aware of how he/she feels about the subject by acknowledging what you have seen and heard for example, "Michel, you seem very angry about this"...the participant will either confirm or correct the facilitator's observation. If the participant is angry ask him/her to give more information e.g., "Please tell me what happened that led to your being angry" (when the participant provides this information, it will present an opportunity for others to determine what might help to resolve the conflict. For example, the participant may be angry because of a misconception, wrong information, or miscommunication).

4. Separate the person from the problem. Responds to the issue(s) being raised without attacking the person who is presenting the issue.
5. This can be done by summarising what the person has said, e.g., "Stefan, if I understood you correctly, you have a concern about discussing sexual orientation in the workplace." Then reframe the issue(s) as a statement or question for others to respond to, e.g., "Does anyone see a relationship between sexual orientation and organisational policies/benefits?" Allow for responses from the group.

Clarify misunderstandings, terminology, or misconceptions. Sometimes conflict occurs because people are working with inaccurate information and perceptions. By exploring the participant's definition and understanding of a situation, the facilitator may be able to offer (or ask the group to offer) additional insights and perspectives.

1. The facilitator can **clarify a situation** by interpreting ideas, rephrasing statements to check content, or providing information to clear confusion. For example, "Sergio, I want to make sure that I understand your point of view...It is important to you that everyone you work with speaks English... The last U.S. Census indicates that over 90% of people who are born with a first language other than English try to learn English as soon as possible. It can take as long as seven years to achieve fluency. What are ways in which staff can assist an English learner..?"
2. **Terminology can be a source of conflict** because people will have different understandings of what a word means or use a word as a code phrase. The statement "We are all Dutch" is a good example. Ask participants what "Dutch" means to them (try to elicit many different opinions). Explore common understandings and differences. Discuss whether or not it is important to come to an agreement on the term.

Ask for more information. Use open-ended questions to explore ideas and concerns about a subject. Look for areas of common agreement or understanding. Solicit ideas initially from participants who appear comfortable

¹⁵ EPTO, Manual for Peer Trainer, Diversity and Anti-Discrimination©, ADL-A world of Difference programme®, 2018

in the workshop. If the discussion is becoming heated, ask the participants to take a moment to write down their thoughts; then ask them to think about whether or not it is possible to resolve the issue in a way that is mutually agreeable. If not, they may need to agree to disagree.

Techniques

1. **Take a break.** Offer to continue individual conversations with participants during the break or later in the day.
2. If a participant is having difficulty with the workshop, **meet with him/her individually** to determine if other options (e.g. taking a time out, leaving) would be useful. Be sure to let the participant know that you trust his/her decision.
3. Whenever possible, **address people by name.** It can assist the facilitator in establishing rapport with the participants.
4. **Count to ten** (silently) before responding to a “hot button” issue.
5. **Elicit** other opinions from the group.
6. Try to **understand the perspective** of the participant. Try to identify what fears/concerns, interests are behind his/her statement.
7. **Relax.** Take a deep breath. Examine the conflict, “What would create greater harmony?”
8. **Create opportunities** for people to change their mind and save face.
9. **Avoid argumentative** responses.
10. If appropriate, **reframe disagreements** into problems to be solved by the group.

Some Simple Steps

Sometimes a conflict can appear suddenly, interrupting the workshop process. As facilitators, you may have a first reaction like, “What am I going to do now?”

One of the first and key steps in conflict resolution is to clarify perceptions and agree on the facts. The sooner this is done, the easier it is to prevent misunderstandings. The simplest way to clarify perceptions is to ask participants;

“What did you observe?” or “What happened?” Be sure to avoid interpretations at this point, and just get the different pieces of the story.

After clarifying perceptions, **focus on:**

1. Expressing emotions and identifying needs
2. Understanding the meaning or lessons of the conflict for the group
3. Making requests and decisions for the future

D5. FEEDBACK AND LEARNING IN PEER-TO-PEER PROCESS

D5.1: HOW TO PROVIDE A VALUABLE FEEDBACK

This simple feedback process will allow you to look at and evaluate yourself and your peer training team within a supportive environment. Use this feedback process during practice sessions and following actual workshops and programmes. The feedback process is an important tool for identifying strengths and skills that need additional development.

When providing feedback to other peer trainers, it is helpful to use “I” statements. “I” statements are important for avoiding generalisations and for keeping comments and suggestions focused on your own personal experiences, rather than speaking from what you believe others think. “I think your presentation would have been more effective if you had explained all the directions before you told people to form small discussion groups.”

In providing helpful feedback to one another, begin by clearly articulating those areas of strength you observed. Then, address in a constructive way areas in need of improvement. Avoid providing positive feedback as an introduction or add-on to your constructive feedback. For example, avoid saying, “I thought you were well prepared, BUT . . .”

Remember, although peer trainers learn from constructive feedback, the positive comments are equally important in building confidence and affirming existing strengths. Begin by clearly describing what was done well. “Your group was well prepared. I appreciated that you knew the activity and you all seemed to work well together.” “I liked the way Roberto wrote the responses on the chart paper while Ella generated responses from the group. The

story you told was a great addition, too.” After this positive feedback, you can add any suggestions that might make the presentation even better. “I was sitting in the back and I had a little trouble hearing your voice when you asked some of the discussion questions . . .”

1. What did I/we/you do well?
2. What could I/we/you have done differently?
3. Other comments?

What's next?

Just as the participants are asked to do action plans at the end of a workshop, the peer trainers should also have action plans. These should include:

1. Follow-up strategies with the host organisation and/or participants
2. Steps to improve their own knowledge and skills

D5.2: How to sustain learning in peer education¹⁶

This chapter is dedicated to another important aspect of your peer education project: the methods. What distinguishes peer education from other teaching methods is that learning doesn't happen in isolation; it is a mutual process based on a peer factor. Peer factor is a magnet, which brings people together, be it a similar characteristic such as age, background, gender or culture or as shared perspective, such as an interest, concern or even identity. In this chapter, you will get a chance to reflect on peer education methodology in your own work.

1. THE LEARNING ENVIRONMENT

When you deliver peer education activities, you are responsible for creating an environment where people can learn from each other. In addition to choosing a convenient venue in terms of space and accessibility¹⁷, this includes the following aspects:

1.1. Competent facilitation

If your project involves training and/or group work, choosing the right facilitator(s) is important. This means finding someone who can connect with the participants and is

able to demonstrate the necessary knowledge, experience and skills to manage the group process. Good facilitation helps everyone feel valued and understood and encourages participants to be involved in their own ways.

The role of the facilitator within a group is...

- To keep the group focused on the task
- To remain as neutral as possible
- To involve and encourage everyone in the group
- To listen and contribute
- To remind the group what has been discussed.¹⁸

1.2. Safe and supportive environment

Creating a safe space for participants to connect and get to know each other is a first and essential step in peer education activities. A supportive environment encourages learners to take responsibility for the activities they are involved in. If you and/or your participants haven't met before, including one or several “getting to know each other” and/or “icebreaker” activities is the right way to go. You may also start with an energizer to pump up the good energy in the room.

1.3. Common ground

Despite sharing a peer factor, your participants are essentially a group of individuals with their unique personality traits, experiences and values. It is important to bear this in mind when working with others and be open to individual differences. Instead of relying on hidden expectations, allow your participants to create a set of guiding principles for their work and find common ground. When people own the rules, they are more likely to feel a sense of ownership. Establishing ground rules may also come handy should the group run into conflict.

1.4. Experiential learning

Experiential learning is the process of “learning through experience”, or “learning through reflection on doing”. It is an approach that involves all aspects of the person, and

¹⁶ EPTO, Toolkit for Quality Peer Education, 2016

¹⁷ EPTO, Toolkit for Quality Peer Education, 2016, See chapter 4 “How to work with people ?” / 7. Venue

¹⁸ SALTO Youth Cultural Diversity Resource Centre. “PEERing In PEERing Out: Peer Education Approach in Cultural Diversity Projects”.

focuses on the learning process for the individual. It is distinct from didactic learning in which the learner is more passive. It means using methods that give people the opportunity to live meaningful experiences on a specific issue, topic or situation. When participants experience these aspects themselves, they are more likely to empathize and relate.

1.5. Inner diversity and learning patterns

- How do you like to learn?
- Do you need to experiment in order to understand?
- Do you plan everything in advance?
- How do you measure progress?
- What about creativity?

Awareness of your own way of learning is called metacognitive ability. In peer education settings, it is extremely important to raise such awareness on metacognitive abilities and take into account the diverse learning patterns of the participants. People who learn how to recognise and embrace their own approach to learning – those who develop metacognitive abilities – can identify what makes learning meaningful for them resulting in a profound sense of empowerment and improved engagement with your activity. It is not always easy to propose such a frame for people to fully explore their ‘inner diversity’ (the way one learns, communicates and processes information), but it is recommended that you diversify as much as possible the formats of the activities, so that everyone truly connects at one point or another. So try alternating classic presentations, small group discussions, creative exercises (drawing, collage...), role plays, visualisations, meditation, activities involving movement (warm-ups, dance, mime...), use of digital media, etc.

1.6. Flexibility

In peer education it is essential to leave space for participants’ ideas and to be responsive to the group’s needs. Sometimes, a planned activity doesn’t work the way it was supposed to because the group is not in the “right mood” to engage with it, or because the format is not adapted to the learning patterns of the participants. This means you have to be flexible with your agenda. You can exchange or skip activities to keep people focused without losing sight of your goals. You can be transparent about it and have a direct conversation with the group, asking them what they would like to change in the process to be able to contribute better.

2. THE LEARNING OUTCOMES

Over the course of a peer education project, young people develop many competences that they can transfer and utilize in their personal and professional life. It has been demonstrated that peer education, and non-formal education in general, enables youth to develop a wide range of competences, such as a growth mindset, self-awareness, self-confidence, communication skills, teamwork skills, public speaking skills, facilitation skills, leadership skills, etc.¹⁹

So designing and implementing a qualitative peer education project requires making such learning outcomes explicit and sustaining it with young people involved. For each peer education project, you can develop a competence framework, i.e. a grid listing all the competences (knowledge, skills and attitudes) you expect young people to develop. Such frameworks already exist at the European level, notably the ETS competence model for trainers in the youth field to work at international level²⁰, from which you can draw inspiration.

¹⁹ See for instance European Youth Forum, University of Bath, GHK Consulting. “The impact of Non-Formal Education in Youth Organisations on Young people’s Employability”: http://issuu.com/yomag/docs/reportnfe_print

²⁰ The SALTO Training & Cooperation Resource Centre, “ETS Competence Model for Trainers”

Defining such learning outcomes of your peer education project requires taking into consideration where young people start from (BEFORE), what they will actually learn (DURING), how they will transfer their learning (AFTER) and how they will continue learning (LATER). At each stage, it is important to think about ways to help young people become aware of and/or demonstrate their competences.

WHEN?	BEFORE	DURING	AFTER	LATER ²¹
WHAT?	Previous experiences and competences of participants related to the topics addressed by the project	Development and assessment of competences throughout the project	Transfer of competences in personal and professional lives	Improvement of competences / lifelong learning
HOW?	<ul style="list-style-type: none"> – Interviews – Focus groups – Application forms 	<ul style="list-style-type: none"> – Self-assessment questionnaire – Peer review – Mentoring system 	<ul style="list-style-type: none"> – Certification process – Recognition tools and systems: Youth Pass, Council of Europe Youth Work Portfolio... 	<ul style="list-style-type: none"> – Evidences of practice (reports, agenda samples...) – Additional trainings and curricula

D6. HOW TO EVALUATE AND TO REPORT

Evaluation²² is usually the final phase of the project, even though intermediate evaluations can be carried out. The final evaluation is the process of collecting information and set up criteria to:

1. Assess what has been achieved;
2. Explain how it happened;
3. Better plan future training courses/workshops.

Therefore it should include:

- The results achieved;
- The objectives reached;
- The financial management;
- The impact on the target group, organisation and community/environment;
- The process.

Even though the evaluation comes at the end of a training course/workshop, it is still to be planned in advance as everything else. It should be clear from the beginning how it will be done and who will do it.

EPTO is saying, that “feedback, monitoring and evaluation can range from a single question to a lengthy survey. The easiest way to decide what process is best for you and your project is to ask yourself what you want to get out of it. Perhaps you want to know more about your team or the workshop you have delivered. Or maybe you wish to find out what gaps or other projects are already out there. Perhaps you want to learn about what matters to people so that your work aligns with the needs of your community. As you can see, there are many different reasons why.

²¹ See also EPTO, Toolkit for Quality Peer Education, 2016, chapter 8 “How to follow-up”

²² EPTO, Toolkit for Quality Peer Education, 2016, p. 83

ME

- How do I feel about this workshop / project / team?
- What worked well today?
- Is there anything I didn't enjoy?
- How was my contribution?
- What could I do differently to better fulfil my role?
- What resources do I need?
- How much time / energy am I able to commit to this project?

MY TEAM

- What was our aim?
- How are we doing as a team?
- What went well?
- What didn't go well?
- What are the key lessons for us today?
- Based on what happened today, is there anything we need to do differently in the future?

MY PARTICIPANTS

- How did you find today's event?
- What did you most like about today?
- Is there anything you didn't like?
- What are you taking away from the event?
- Would you recommend this workshop to your friends?
- Is there anything else you would like to share with us today?"

These are the questions you can ask for the check-ins and check-outs of the day, buzz groups, final evaluations or even for the reflections about the local peer practice. For this training course it will be important both to evaluate the **success of the training course** implementation from your, your team's and participants' perspective as well as to **monitor the activities that will be carried out after the training course** (the peer practice, remember the "Project rivers"?).

Choose appropriate tool to ask these questions. The tools can be:

- a verbal conversation
- an online survey/questionnaire (e.g. Google Forms)
- journal

- post-its
- barometer
- evaluation form
- special games
- and many more!

For **monitoring** the peer practice (local info sessions that youngsters will implement after the training course) and collecting valuable experiences we recommend to prepare an online form (e.g. Google Form). Ask participants to answer several questions after they complete their info sessions. Do not make it too long:

- Name of the person
- Organisation
- When the info session happen?
- Where did it happen?
- How many young people participated?
- What was the topic, aim?
- Any other comments

Share the link to the reporting form with all participants and make a common agreement that everyone fills it in. You can also ask for a picture from their workshop that you can use later one for online communication.

D.7 F.A.Q. FROM PEER EDUCATORS

After young peer educators had the experience to deliver a short info session during the training course, we collected some of their questions. Below we prepared a short F.A.Q section with our suggestions where to refer for more information. Just have in mind, that most of the questions do not have a straight forward, one-and-only answer. This is the opinion and recommendations from the authors of this manual. If you will your own solutions to these questions – let us know your opinion!

RESOURCES:

Where to look for new tools? (if you're not that creative)

Please refer to various other manuals and online tool-boxes. You can try to google them. Several references to check for inspiration:

- EPTO, [Toolkit for Quality Peer Education](#), 2016 (check it throughout);
- Ž.Gailius, A. Malinauskas, D. Petkauskas, L. Ragauskas, [Handbook for People Working with Youth Groups](#) (at the last chapter you will find plenty of methods for your pocket);
- [Salto-Youth Toolbox online](#) (hundreds of useful tools for learning - for youth work and training activities, that can be searchable on various criteria).

Where can I find ideas for activities?

If you are looking for a topic or a theme to focus, a good referral document is the research results of the [Future Youth information and counselling: Building on Information Needs and Trends](#) and the [Executive summary: Future Youth Information Toolbox foresight activities looking into youth information work 2030](#). They give great insights on what kind of information topics young people are interested in or will be in the future. We hope this will inspire you to plan a workshop as a peer educator to your fellows accordingly.

What is more – a lot of great initiatives on peer-to-peer activities are already happening in Europe. Get inspired by looking at the [ERYICA Good Practice](#) publication.

How to get allowed to do a workshop in an institution?

This task will require your skill to network and communicate your aims to the managers of the institutions you want to implement your activities at. In the EPTO, [Toolkit for Quality Peer Education](#) Chapter 4 (from p. 49) you will find some good tips and hints how to pitch your ideas to different stakeholders.

YOUTH INFORMATION:

Where to find serious sources for information? How do you know they are true? What should we check before giving our peers tools on the internet?

This is a skill that you need to train day by day while searching for quality information. You can check [ERYICA Guide to Safety and Quality Online](#) starting from page 26 for the criteria. Two main rules are always to remember: always stay critical and double-check your sources!

How to gain your knowledge of information to provide young people with?

Find relevant resources (as you probably know that there are limitless sources for any topic out there) and choose those that are the most relevant to your planned activity. You might need to watch some videos, read some articles or manuals, listen to some podcasts, participate in a training course or even to talk with your youth information worker. Most important – make sure you have quality information resources.

CO-FACILITATION:

What if people who are helping you does not deliver their duties and responsibilities? What if I'm alone and no one helps me?

Teamwork is the key word here. Learn more about the process of teams and how to make agreements between you and your colleagues in T-kit No. 6 [“Training Essentials”](#) in chapter 2.

NEEDS ANALYSIS:

How to know what a group want/expect in advance? What should we expect as outcome for the group at least? (one new thing learnt, a changed mind)

Learning more about the learning needs and experience of your participants is very important before you start planning the activity, but also can happen at the very beginning of the workshop. Learn more what to do in different situations in T-kit N° 6 [“Training Essentials”](#) page 39-50

FACILITATION/ AGENDA/ WHAT IF...:

What should I do when there is a lot of time left but I have done all the things I had prepared? (some specific plans or games)

Have some games and methods prepared for this kind of situation (have a plan B). What is more you can use this

time to ask for feedback about the workshop, answer questions from participants or make a little questionnaire and find out what would be other topics these young people would like to learn about in the future?

What if computer and projector break?

Depending on the group size, if projector does not work – maybe you can show it on the computer screen? It is always good to have your presentation somewhere online, so you can share the link with all the participants and they can open the document with their smartphone. You can also try to use the flipchart and paper and markers and draw, write some of the information live.

What in your opinion is the best time a workshop should last?

It should be as long as you have useful content to share and keep participants interest in. We recommend to make breaks after about 1h of a session (for at least 10 minutes) if your workshop is longer. Sometimes you might be constrained with some time limit (e.g. you are doing your info session at school during a lesson, and a lesson lasts 45 minutes). Make sure you do not overload a short session with too much content.

How much preparation do we need before a workshop / info-session delivery?

It really depends on your experience and how well you know the topics. If this is the first time you will do something like this, you might need more time (several hours or even maybe several days).

How do you know if you achieve your goal while working in a group?

The key word here is Feedback and evaluation. Just ask! Read more about the evaluation part of the process in the sections A4 and D5 of this manual.

How to involve everyone in the activities? What to do if a person is too shy to properly participate or has otherwise difficulties or even obstacles in participating? How can I involve passive persons? Any tips to deal with bored/annoying/disrespectful/sceptical participants?

There is no right answer to this. But the main rule of thumb is that participants will be interested in the activity when

the skills they have will meet the challenge of learning you give to them in the process. Meaning that if you have a very skillful and knowledgeable participant in the topic, he or she will simply be bored. Maybe in this situation you could refer to the experience of the participant and give him or her more responsibilities? And in vice versa situation, when challenge is too big, they will feel scared or shy to take part in. Maybe let them be or dedicate some time to get to know each other to feel more safe? The stage at which group is, plays an important role to the atmosphere in the group. Learn more about the group development stages in the section “What is a group?” of the manual. Please refer for more information to pages 93-97 of the T-kit N° 6 “[Training Essentials](#)”

What should I do if the atmosphere is bad and everyone is very confused? What should I say?

These kind of situations are quite often to happen when the instructions are not clear enough or it is hard for the participants to follow the content. Do not be afraid and clarify the situation with the group. Several tips how to deal with these situations:

1. Have all the instructions of the tasks visualised (written, drawn) on a flipchart or using a ppt. Have handouts, printouts to give to participants for later reference.
2. Reframe your sentences or repeat same thing but in other words.
3. Clarify with the group and show support. Ask: “Can you follow what I am saying?”, “Are the instructions/question/task clear enough?”, “Are there any questions?”. If the group has any questions, answer them using suggestions 1. and/or 2.

ACTION PLANNING:

Can you make another/specialised workshop with the same group?

Of course. It will even help you to organise it the next time – the group members will know each other, they will already have experience in participating in such workshop, etc. That is why the next time you maybe do not need to play a name game.

Soo...what's next? How to keep motivated and dare to use this method/talk about topics/organise events?

Motivation is a very broad topic. Probably you have your own strategies how to stay motivated in such situations. Same as to participants, the team members will be interested in preparing and delivering the activity when the skills they have will meet the challenge they face. Meaning that if you already done the same info session for 15th group of peers already, maybe you will simply be bored? Maybe you can try to step out of your comfort zone and choose a new topic or a new target group? You might feel continuing your own training process as peer educator to acquire new knowledge or skills? Another very important aspect is the connections – other people might keep you motivated because you will like spending time with them. This might include your team members, youth information worker, etc. You can seek support and motivation from them – make an agreement that you keep up with each other online and have regular meetings.

After we do meetings in our home country with peers, what is next step? Should we document the whole meeting and tell you about the results?

This will depend on the organisers of the training course. They might ask to fill in a short survey or provide a picture. Maybe if you are from the same region - you might have a meeting and reflect your experiences together? Ask your trainer and youth information worker about how you will proceed with the reporting.

Are the topics that we have to work on it in our home country just about employability-employability-data protection OR can we also use other topics?

These can be any topics that connect to youth information needs. The closer they are to the needs of your peers, the better. They will differ city from town, pupil from student, country from country, younger age group from older age group, etc.

To go further
